Why Poultry Buyers Pay a Premium for Broilers Protected with SULFADUINOXALINE

Poultry buyers pay premium prices for quality broilers. Don't let coccidiosis cheat you out of higher returns for your birds. Your first step is to purchase a quality feed containing preventive levels of SULFAQUINOXALINE.

Exposed birds protected with SQ feather uniformly, without delay, and have better shank color. Market weights as high as 12 per cent above those of unprotected birds have been reported. This type of top-quality finish brings greater profits.

Production costs are cut as much as 9 per cent when you prevent coccidiosis with SULFA-QUINOXALINE. This is because deaths and stunting are drastically reduced. Feed efficiency may be increased by an average of 6 per cent.

You can feed SULFAQUINOXALINE right up to marketing time. Used successfully in thousands of flocks, SQ is the only product effective against all dangerous poultry coccidia.

Don't take a chance; SQ may make the difference between profit and loss. Tell your dealer you want feeds containing SULFA-QUINOXALINE.
