Roasts of pork are thrifty and easy to prepare. Pork shoulder roasts and loin roasts both are inexpensive and need only to be placed in a slow oven (325 F.) until thoroughly cooked.

Many homemakers are interested in freezing the pork they find on sale currently. Best buys for freezing are fresh cuts rather than smoked ones such as ham or bacon. Fresh pork may be kept three to four months at zero; hams should be used within two months, and sliced bacon never should be

HOUSEHOLDERS LIABLE FOR S.S. TAXES

"If you pay \$17 a month or more to your baby-sitter or maid, you will probably have to pay a social security tax in April," Myron Milbouer, manager of the Wilmington district office of the Social Security Administration, said today. SPRING OUTFITS CAN BE STYLISH IN DECEMBER

Talk today among women is of spring bonnets and Easter suits because women all over the nation are busily planning what they'll wear in their hometown Sunday morning parade.

But with a little extra planning these sping outfits can be worn effectively the year round - and hat's mighty important to the ady on the limited budget.

Ruthe Pearce, extension cloth ng specialist at the University of Delaware, suggests buying shoes and other accessories with the same care that you'd buy an expensive coat or suit. When buyng shoes, keep in mind your own comfort, health and appearance. Avoid highly decorated shoes that call attention to your feet.

Spring Clean-up Time Nears

Will Spring be a little late this year for you? Have you put off that spring house-cleaning job until it is now a man-sized job? Is t such a mountainous job that you ook on it as drudgery?

Home Management Specialist Joanne W. Reitz tells homemakers that certainly cleaning the house is a necessary and important part of a homemaker's activities, whe ther daily, weekly or seasonal "And if the busy homemaker isn't careful of her work habits, she may find her cleaning duties piling up," claims the specialist with the University of Maryland Extension Service.

Too, the homemaker will have o watch those same work habits or she may find herself very tired at the end of the day, the week or season — so tired she can't enjoy her family or even some of her own activities. While an annual Spring and Fall house cleaning may have certain advantages, too often it leaves the homemaker physically and emotionally exnausted and family relationships oadly strained. Homemakers are finding that by distributing special cleaning processes over a period of time, they are able to elimnate these annual "upheavals."

Even when a homemaker has worked out a satisfactory plan for distributing cleaning over a period of time, there is often much she can do to cut down the work involved and to make the task more pleasant. Miss Reitz points out a few short-cuts:

1. Consider the extra time and energy it takes to move and dust the little knick-knacks and "thinga-ma-bobs." If you have no special attachments for them, put them away!

2. Use the best tools

ledges above doors, etc. 3. Use correct cleaning supplies that make the job easy. For not in "Fibber McGee's closet."

5. Use good posture and elimihelp you "reach."

A Superior New Coccidiostat NiCarbazin

NiCarbazin is an entirely new chemical developed by Merck specifically for the prevention of coccidiosis outbreaks in chickens. It is far more effective than any other coccidiostat now used for continuous preventive feeding.

HERE'S WHAT NiCarbazin DOES

• Hits the most damaging coccidia hard, early in their life cycle—you see no bloody droppings. • Cuts deaths from coccidiosis to zero, even

when losses in untreated birds are as high as 60 per cent. • Eliminates intestinal tissue damage that

causes unthriftiness and downgrading.

Permits development of natural immunity.

HERE'S WHAT THIS SUPERIOR PROTECTION MEANS

· Birds have better market weights. • Feed efficiency is increased as much as 6

per cent over that of untreated flocks.

· You get more and better birds to market and increase profits over feed costs.

NiCarbazin is available in the poultry feeds of leading manufacturers. Used continuously, NiCarbazin offers the most complete protection possible against coccidiosis outbreaks. Ask your supplier today for feeds containing
