Mrs. G. H. Nashold and sons, George and Daryl, recently spent three days with his sister and husband, Lt. Col. and Mrs. L. D. Hooker, of Alexander, Va.

Guests of Mrs. Martha Sebell were her daughter, Mrs. Catherine Young and son, Edgar and a friend, Mrs. Ethel Fitzpatrick, all of Syracuse, N. Y. They visited at Rehoboth and other places of interest in Delaware.

Mr. and Mrs. Harry Flanagan and son, Michael, spent the weekend at Niagara Falls, N. Y.

Mr. and Mrs. Charles Pete and family, of Toronto, Canada, were Thursday guests of Mr. and Mrs. Joseph Flanagan.

Asbury Methodist Church Notes

We invite you to begin this Sabbath by attending one of the church school classes at Asbury. Closely graded material is used for all age levels and a class for all age levels is available. Howard S. Wagner, superintendent, in charge.

Morning worship service 11 a.m. conducted by our minister. A message, the fourth in a series of requested messages, entitled "Work, Blessing or Curse" will be given. A nursery for pre-school children will be available.

Asbury welcomes to its services all new-comers to the community. We covet the opportunity to share our ministry and fellowship with you.

Altar flowers this week will be presented by Mr. and Mrs. Harvey Pearson of Philadelphia in memory of Mrs. J. C. McIntyre, mother of Mrs. Charels L. Peck, Jr.

Friendly greeters will be Mr. and Mrs. Thomas Peck. The usherers for the month of September will be Frank Quillen, Charles Callaway, Willard Schreck and Horace Johnson.

The W.S.C.S. will meet Tuesday evening, Sept. 4 at 7:30. The Ever-Ready Sunday School Class annual Flower and Art Show will be held Sept. 5 in the Collins Building beginning at 7 p.m.

Mrs. Coretta J. Mason will conduct a preaching mission at Asbury beginning Sept. 9 at 11 a.m. and continuing nightly through Sept. 16 with the exception of Saturday, Tues., Sept. 11, at 12:30. The ladies of the W.S.C.S. will hold a covered dish luncheon and all Methodist ladies of the community are invited. Each person is to bring a covered dish, their place setting, and a quarter. Mrs. Mason will be the speaker.

Members participating will prepare their favorite dish before judges, then display it at an attractive and appropriate table setting. County winner will then participate in the State Contest two weeks later.

Delaware Food Market Report

September is such an important and busy month that the "Thirty Days Hath" doesn't seem sufficient. Labor Day leads off the month in true holiday style but from then on the change of pace necessitated by the ringing of the back-to-school bell takes over. It is Better Breakfast Month too, and also the beginning of the frozen orange juice industry promotion. So, now is the time to give those summer menus a good look-see and make whatever changes are necessary in the transition from summer to fall living. Be sure to check the list of tempting September plentiful foods and include them in a variety of tasty nutritious dishes.

The most plentiful food items says the U. S. Department of Agriculture, will be frozen orange juice and fresh pears. Both are well suited for meal and snack time uses. You will find frozen orange juice exceptionally economical now, largely because of the record breaking pack on hand. There were recently 115 1/3 million gallons available and that is a lot of orange juice. Due to the large supply prices are, and will be low.

Bartlet pears are excellent this year and will be marketed in heavy volume during September. Everyone enjoys this fruit whether they are in salads and desserts or served "as is". They are ideal for the lunch box. Pears go well with meat and poultry garnishes and make good preserves and compotes.

It is also a good year for grapes. The principal varieties being marketed in September will be Thompson Seedless and Flame Tokays, both from California. Don't overlook locally grown grapes for they are plentiful too, and now is the time to make grape jelly and jam. Don't forget everyone likes grape juice.

The other plentiful for September are late summer vegetables of which there are a wide variety to select from, salad oil and milk.

Here is good news. More beef will be heading for dinner tables during these last four months of 1962. There will be less pork, chicken and turkey, however, than last fall. This is a prediction from the Economic Research Service of the U.S.D.A. This increase in beef is expected to mean slightly lower prices on the average for steaks, roasts and hamburgers at food stores.

Favorite Foods Show

The fall 4-H program will start off in Kent County with a Favorite Foods Show Sept. 15 at the Delaware State Fairgrounds. Any 4-H'er carrying a foods project is eligible to enter. Entry forms have been sent to club members and local leaders.

Members participating will prepare their favorite dish before judges, then display it at an attractive and appropriate table setting. County winner will then participate in the State Contest two weeks later.

Greenwood

The Pilgrim Holiness Church on Addix Avenue will observe its first anniversary on Sunday afternoon, Sept. 2, at 2:30 p.m. The Rev. Milvin Dieter, President of Eastern Pilgrim College, Allentown, Pa., will be the guest speaker. The Mennonite Male Quartet will be singing, and there will be other special numbers of vocal and instrumental music.

The Rev. Dieter will be speaking at the morning worship service also, at 10:45.

Jacob Hatfield and Ellen Horace Maloney, Jr. have just returned from spending part of last week as guests of Mrs. Albin P. Ottey in Media, Pa., while Mr. Ottey attended the Rathkamp Matchcover Collector's Convention in Allentown, Pa.

Guests of Mrs. Minnie Owens this week are her daughters, Miss Ottalie Owens and Mrs. Mary Louise Clifton, both of Wilmington.

Mr. and Mrs. Robert Reichert and their daughter, Lee, and Mrs. Olga Cavanaugh, of Salisbury, Md.; and Mrs. N. Mack, of Georgetown were Sunday dinner guests of Mrs. Jeanette Sadowski.

Last week, Mrs. Jeanette Sadowski, accompanied by Mrs. Nettie Mack, of Georgetown, attended the 8th birthday party of Mrs. Sadowski's granddaughter, Karen Seeneey, in Bound Brook, New Jersey.

Mr. and Mrs. Jerome Hutchinson, of Kennett Square, Pa., are house guests of Mr. and Mrs. Robert McDowell and family this week. Mrs. Hutchinson is Mrs. McDowell's sister.

The Mills family reunion was held at the home of Mr. and Mrs. Walter J. Mills on Sunday, Aug. 26. A covered dish meal was served to the 43 guests present.

Mrs. Paul Lamberston, of Pittsburgh, is a house guest of Mr. and Mrs. Walter J. Mills this week. Mrs. Lamberston is Mr. Mill's sister.

Mr. and Mrs. Ralph Hynson of Greenwood recently returned from a plane trip to Oak Harbor, Wash., where they were guests of Joe and Phyllis Hynson and children, Michael and Sharon. Places of interest visited were the World's Fair on Delaware Day where they met Gov. Carvel, Mt. Baker National Park, Washington State Salmon Fish Hatcheries and Olympic National Park. Ralph and Joe

Mrs. Percy Lenz and son, Wayne, of Easton, Md., visited Mr. and Mrs. Oscar Gillette on Monday of this week.

**Farm News**

**Snakes**  
Are you scared of snakes? There's no need to be as long as you respect them and leave them alone. Here are a few tips on dealing with poisonous snakes.

1. Mow high grass and weeds where snakes may be.
2. Clear away debris and trash where snakes might bed.
3. Protect your feet and legs with heavy shoes, socks and trousers.
4. Look before reaching down into the vegetable patch.
5. Remove rock piles, piles of wood, and other debris.

If you should be bitten, keep calm. Never take any kind of alcohol. It spreads the poison. Kill and identify the snake. It may help the doctor treat you. Get a doctor as quickly as possible.

**Reduce Hay Mishaps**  
Operating hay-making equipment demands skill, good judgment and common sense. Here are a few simple rules that will make your harvesting operations a lot safer. Always shut off the power before cleaning, oiling or adjusting the machine. Keep the power take-off shield and other safety shields in place; they're for your protection. Do not permit extra passengers on tractor or loaded hay wagon. Handle your tractor with care, particularly on public roads.

**Chemical "Tools" Protect Our Food**

Large amounts of safe, tasty, wholesome food in America are no accident, says George Vapaa, the Kent County farm agent. Nor are our healthy living habits or rising yields of crops, he adds.

These benefits have come to the public largely from the use of new chemical "tools." The Food and Drug Administration is our public watch dog. Their job is to insure that these tools are safe and free from health hazards, the agent stresses.

Says Vapaa, "Would you trade your life here for that in a poor foreign country

- Where flies and fleas spread filth and disease.
- Where mosquitoes transmit malaria.
- Where the food is poorly protected from germs.
- Where frequent hunger is due to poor crop yields.
- And where the animals suffer from diseases.

All of these cases exist because the people lack sound farm facts. We were once at the same, sad level."

Most new farm research results do not make the news. But the few accidents with any new tool will, says Vapaa. Scare stories like "Your Salad Bowl May Be Lethal," is a recent local example. It is like saying: "Put away your car boy, it can kill you."

Farm pesticides might kill you

**Teacher Exams Set For Oct. 13**

The State Department of Public Instruction will administer the National Teacher Examinations Sat., Oct. 13, it was announced by Dr. John G. Parres, State director of research and publications and examination supervisor. The examinations will be held at the Wm. Henry Comprehensive High School, Dover.

Scores on the National Teacher Examinations can be used by teachers (1) to validate college credits earned at non-accredited colleges; (2) to add teaching fields to Delaware certificates already held; (3) to complete requirements for a major teaching field when the applicant lacks 6 or less semester hours of being fully certificated and has had at least three years of successful teaching experience in the particular field; and (4) to satisfy certain course requirements in professional education.

Delaware teachers or prospective teachers interested in taking

ures and containing sample test questions may be obtained from the State Department of Public Instruction.

The closing date for submitting applications and examination fees is Friday, Sept. 21. Applications received after that date cannot be honored.

Applications for the examinations and bulletins of information describing registration proceed-

**Caesar Rodney School News**

Over 4200 boys and girls are expected to answer the call of the bells in the schools of the Caesar Rodney Special School District on September 6. Of these approximately 1490 will attend school at the Air Base to which six classrooms and multi-purpose rooms are being added this summer.

About 700 pupils will be moving into the brand new Simpson Elementary School located on Old North Road of Camden-Wyoming. This school is a part of the District's omnibus building program which is expected to be completed in the fall of 1963 with the occupancy of the Allen Frear School at Rising Sun. In addition to the Simpson School, the boys and girls of the Caesar Rodney High School will be using areas renovated and remodeled with the gymnasium and locker rooms being completely refinished and modernized.

Dedication and open house of the new W. B. Simpson School will be held on Sunday afternoon, September 9, at 3:30 p. m. Rev. Frank Lucia will make the dedicatory address. Open house will be held from 4:30 to 6:30 p. m. The new school, named in honor of the late Dr. William B. Simpson, former superintendent, was designed by Architects Dollar, Bonner, Blake and Manning of Wilmington. It is a modern 24-room structure with administrative, library, cafeteria, gymnasium, music and art facilities. The total cost of the building, grounds, and equipment was approximately \$1,225,000.

The Caesar Rodney Special School District employees 185 teachers with Archie Jordan and assistant Robert Coleman heading the Caesar Rodney High School; Robert Fisher, Caesar Rodney Elementary School; George Benner, W. B. Simpson Elementary School; Edith Guy, Star Hill Elementary School; John Ryan, Air Base High School; and David Williams, Air Base Elementary School.

Dr. George R. Miller, Jr., State Superintendent of Public Instruction, will address the teachers of the District at a luncheon meeting on September 5. Orientation and planning sessions have been arranged for all teachers on September 4.

**Poetry Writing Subject of Extension Offering**

For persons who have poetic impulses but no training to write, the University of Delaware English department through the division of extension will offer a course in the art of writing poetry this fall.

Robert Huff, a member of the faculty and a publishing poet and critic, will teach the course on Wednesday evenings in Wilmington. It is available with or without credit.

The course will consist of lectures on the elements of poetry that distinguish it from prose and criticism of both established poets and members of the class. It is intended to benefit students actively involved in writing poetry or who are generally interested in the craft.

Information on fees and registration procedure may be obtained from the office of extension. Registration is scheduled for the week of September 10 at various places throughout the state.

**Nazarene Church Notes**

9:45 a.m. Sabbath School. All those that go out to work will be honored this week. The theme of the adult lesson is "Laying the Foundations."

11 a.m. Morning worship. We expect our pastor back from vacation. She will be bringing the message.

6:45 p.m. N.Y.P.S. "Paul and Company." Leader, John Ottinger.

7:30 p.m. Evangelistic service. Tues., 8 p.m. Official board meeting.

Wed., 8 p.m. mid-week prayer meeting.

The winner of the "Write a Poem" contest was Ilene Cain. This is the poem:

**THE CHURCH**  
We go to church to learn and pray,  
There we meet Christ, who is the way.  
Christ will take away our sin,  
And make us pure within.  
He promised He would never forsake,  
If His blessings we will take.  
There, true friends we find,  
Who seek His love so divine.  
We will always go to Church,  
And there, we will end our search,  
For now we travel the road marked "Right"  
Where Jesus is our guiding light.

MISSILE MANUFACTURER TAKES  
 A 'LOOK-SEE' AT DEL. FOR A SITE

by  
 Carrington H. Burgess

One of the nation's largest manufacturers of aerospace equipment and missiles may be interested in building facilities in Delaware if and when.

The firm, the Aerojet-General Corporation, of Downey, Calif., would first have to be the successful bidder on a government contract. Delaware would also have to offer more than other states. On the other hand, it could be that whoever is the successful bidder, the firm might locate in the state since a factory would have to be built to manufacture the missile contemplated by the government.

On receiving a news release from U. S. Rep. Harris B. McDowell Jr. (D-Del.) that he was accompanying two Aerojet-General officials to survey sites in Delaware last Thursday and Friday, I got in touch with J. Edward Taylor, president of the local chamber of commerce, and suggested we be represented at a meeting in Dover at the governor's office pertaining to the tour.

Ernest Killen, president of the Harrington Industrial Commission, and William W. Shaw, of the Harrington Development Commission were unable to attend. Therefore, I, went to the governor's office Thursday noon.

On asking to see the congressman, one of Gov. Carvel's secretaries replied, "Go on back." We were pleasantly surprised. After all, the Harrington chamber had not been invited. The chambers of commerce at Dover, Milford, Georgetown, and Lewes had. Someone remarked it appeared the Congressman was trying to pick up a few votes from the Republican centers.

It wasn't that way at all, as subsequent information will reveal. When we reached the governor's suite, Carvel was doing an excellent job of selling Delaware, proving that his public-speaking courses with Dale Carnegie were not in vain.

He pointed out the Delmarva peninsula had been, more or less, isolated until recent years. Then a bridge was built across the Delaware at New Castle and one across the Chesapeake Bay, eliminating two ferries. A bridge and tunnel are being built across the lower Chesapeake Bay and two more bridges are contemplated across the Delaware River and Bay. On prompting by a member of a Sussex County delegation, the governor added a ferry was contemplated across Delaware Bay at Lewes.

Taxes and land costs were among the lowest in the nation, he continued.

Delaware is the home of many corporations, incorporated here because of the fairness of our laws and courts, he explained. He pointed out later that state income from these bodies was 14 million dollars annually. The state has a balanced budget, a surplus of five million dollars, he told this reporter. He told the group the state anticipated receiving 21 million dollars in taxes from the sale by the DuPont Company of its General Motors stock and he moved the money be used for improving recreation areas. He gave the DuPont Company a boost by saying it had the biggest pool of brains in the nation and it could be of use to a missile manufacturer.

The governor's quarters were crowded, with many more guests than had been invited.

Congressman McDowell, described as the best politician in the state, said he was desirous of getting defense installations in the state on the loss of the tank plant at Newark and Ft. Miles.

He explained the project in a nutshell: The Federal government would award the contract in three months. The Aerojet-General officials were merely looking over the state for a site. If the company was the successful bidder, the government would buy the land and erect the plant and lease it to the manufacturer. However, the company would also look over locations in other states.

Jack Brigleb, corporate director of manufacturing of the Aerojet-General Corporation, said the installation would have to be along the coast since the missiles, being too large to transport by land, would have to be carried by barge to Cape Canaveral, Fla. It would be a nice, clean industry, and there would be no testing.

In answer to questions from the floor, Brigleb said 5000 to 10,000 acres would be needed and that the plant would employ 1000 men. It was explained the larger part of the acreage was needed as a buffer zone for security reasons. A Lewes delegate said it could be furnished at Roosevelt Inlet.

Brigleb said he joined the company, which has connections with the General Tire and Rubber Company, in 1949 when it employed 2000 persons. It now employs 30,000, he said.

I had asked our congressman to present us to the Aerojet officials and he said "yes," but, as he was so busy, I saw them myself and presented them with the new brochure the Harrington Chamber of Commerce will soon issue to industrial prospects.

Walter Winslow, special assistant to the firm's president, mentioned he would spend the weekend at Ocean City and wanted to know about playing at the Ocean City Country Club. I asked Bill Entwistle, pro at the Shawnee Country Club, Milford, what he could do and he immediately got on the phone and asked Mussolinger, the Ocean City pro, to accommodate Winslow who explained he was playing soon for the championship of his club. I telephoned Atlantic Sands Motel, Rehoboth, where Winslow was spending Thursday evening, and left a message he could play at Ocean City and to reserve an electric cart.

Incidentally, I asked Gov. Carvel if he had made a 45 for nine holes at Hersey at a governor's conference. I had thought maybe it was just newspaper talk, but he replied he had a 43—an excellent score, especially when one considers the busy governor does not often get a chance to play.

While a motorcade was getting lined up and the officials were waiting for a photographer, the governor showed

the Aerojet officials a gavel made from wood taken in the restoration of New Castle County Courthouse and oil paintings by Sully of Commodore MacDonal and Porter, heroes of the War of 1812, and a Lewes commodore, of the same war, whose name escapes me.

State and Chamber of Commerce officials and Congressman McDowell, Brigleb and Winslow, and Vladimir V. Lisovitch, chief of the product development section of the Army Corps of Engineers in Philadelphia, had visited Port Mahon and Pickering Beach Thursday morning, looking at sites.

In the afternoon, the motorcade visited Bower Beach, Slaughter Beach, and Lewes.

Friday, the officials had an aerial view from a company plane which had landed at Rehoboth.

I am particularly pleased Congressman McDowell got on the ball to arrange this tour. Because of the requirement of a coastal site, the tour was restricted to Kent and Sussex Counties. Bob Yerkes, managing editor of The Milford Chronicle (what am I saying), commented that wherever the industry might locate downstate, it would help all of us. It would help Harrington, in itself, and could induce industries supplying parts to locate in this rail center in the Hub of Delmarva.

Felton

The theme of the Rev. Wilmer E. Abbott's Sunday morning sermon was "Wait." Mr. and Mrs. Lynn Torbert were the friendly greeters Sunday morning. The greeters for Sun., Sept. 2, will be Mr. and Mrs. Thomas L. Kates.

### Demonstration Club Wins Honor

Two members of the Glasgow home demonstration club, Mrs. Robert J. Davis and Mrs. William H. Johnson, both of Newark, received top honors in a nationwide essay contest on "The Role of Land-Grant Colleges or Universities in our State During the Past Century." Announcement of the award was made at the 26th annual National Home Demonstration Council meeting at the University of Kentucky. Federal extension home demonstration clubs from 40 states make up the NHDC. More than 7,000 women attended the Lexington convention. The essay contest, sponsored by the National Council, was in connection with the convention theme, "Partners in Progress" which emphasized the co-operation between the home demonstration clubs and the land-grant college system.

The Delaware entry was chosen from a field of 66 essays from 30 states. Each state was eligible to submit the best three entries in a statewide contest. Other Delaware entries included Mrs. Joan Hart, Chestnut Hills home demonstration club, and Mrs. Marsha R. Baird, Woodland home demonstration club.

Second place in the national contest went to a Kansas entry, third place to Indiana and fourth place to Michigan. First prize was a large silver serving tray.

The Glasgow club's essay read in part:

"A Delaware homemaker discusses the Berlin crisis with her daughter vacationing from the University of Delaware but busily trying to complete a tailored suit, her project in Textiles and Clothing for this semester. The homemaker's attention was focused upon Berlin by a report given by the International Relations Chairman at the home demonstration club meeting yesterday. Through the window of her kitchen she can watch her husband spraying the apple orchard according to recommendations made at the University. Her son, a high school senior, is feeding the broilers which he hopes to add to the fund he is saving toward expenses at the University next year.

"This family is one of millions in the United States whose lives are influenced by the vision of lawmakers a century ago, in particular, Justin Smith Morrill of Vermont. It was he who, one hundred years ago, conceived the idea of "people's colleges to provide greater educational opportunities and to promote the liberal and practical education in the several pursuits and professions of life for the working classes of just ordinary people."

Following are excerpts from the other three top essays:

Second—Mrs. Charles Hill, Kansas: "Although the federal land grants failed to provide adequate operating expenses, these land-grant colleges have revolutionized higher education in this country. In addition to providing formal classroom instruction, the land-grant system made research a fundamental college responsibility. And by developing experiment stations, extension services, and vocational education, it took this knowledge to people who could not attend college, and it keeps the farmers informed of new developments. Thus, the farmer is a part-time student if he takes advantage of this opportunity. At no time in history will our land-grant colleges and universities play any more important role than in the near future when population increases and reduction of land under cultivation will provide problems that only our agricultural and scientific knowledge will enable us to solve."

Third—Irene Yankauskas, Indiana: "Ask any Indiana farmer what's new in agriculture, and chances are his reply will begin, 'According to Purdue...' Ask a communication expert about radio and television, and he will credit Purdue with Indiana's first radio station and the nation's first television tube. Mention transistors to an electronic technician and he will trace their development to initial research on semiconductor materials made at Purdue. Ask a homemaker what's new in family living, social security, marketing, health and safety, taxes or credit buying and she will attribute the information to Purdue. Purdue, like her 67 associate Land-Grant institutions, is constantly seeking and finding the answers to 'What's New?'"

Mrs. Errol Reeves, Michigan: "The home, community, state and nation have profited and will continue to profit from this concept of bringing the college into the home of the most humble. Many other countries are following our plan of education. As long as this trend continues, humanity will be enriched."

Recent drought conditions may cause farmers more problems than the obvious ones of reduced

crop yields and poor quality hay and pasture. Dry weather usually increases the danger of silo gas and nitrate poisoning, according to George F. W. Haenlein, dairy research associate with the University of Delaware School of Agriculture. He says nitrogen dioxide gas even in small amounts has been fatal to many humans and animals.

Even in cases not fatal, nitrate poisoning may seriously affect health, reduce milk production, and interfere with normal reproduction. The most alarming aspect of nitrate poisoning is that symptoms, even lethal ones, do not show up until several days after exposure.

Haenlein attributes nitrate poisoning to heavy build-ups of nitrates in plants. Large applications of nitrogen fertilizer, combined with unfavorable growing conditions, sometimes results in abnormally high nitrate contents in the plant leaves. During or immediately after the ensiling process, these nitrates are converted to nitrogen dioxide gas.

This gas is detected as a yellowish cloud which has an irritating odor similar to laundry bleach. Since it is heavier than air, the nitrogen dioxide gas is often found descending down the silo chute into the feed room and other parts of the barn. If the silo is connected to a milking parlor or cattle barn, serious damage to the cattle often result. "The gas may be so diluted it is undetectable by the time it reaches the cattle barn," Haenlein reports, "yet it can cause serious reproduction problems and other less noticeable effects."

Haenlein says several drought stricken crops which have received heavy fertilizer applications should be ensiled only after following detailed precautions. He especially warns farmers of ensiling drought stricken corn.

To insure safety for all concerned, the silo area should be well ventilated during the filling process and precaution should be taken to keep children and livestock away from freshly filled silos. Do not open silos for at least six or eight weeks after filling. Suspected forage should be introduced into the livestock ration gradually over a period of seven to 10 days. Haenlein says cows should always receive adequate amounts of grain during such a period. Also, it is advisable to feed higher amounts of vitamin A utilization by animals.

For a balanced grain mixture, Haenlein advises 3000 International units of vitamin A and 6000 International units of vitamin B per pound of grain fed. Detailed precautions on handling high nitrogen silage may be obtained from your county agent's office, he says.

#### Mrs. Edgar C. Killen

Mrs. Olive D. Killen, wife of Edgar C. Killen, died in Kent General Hospital Saturday from a heart attack.

Also surviving are two sons, Lester A. and Medford E., both of Felton; three sisters, Mrs. Mary Sylvester, Clayton; Mrs. Sadie Lafferty and Mrs. Nellie Deakne, both of Smyrna; 13 grandchildren.

She was a member of Felton Methodist Church, the Avon Club, and the firemen's auxiliary.

Services were held at the Berry Funeral Home, Felton, Tuesday. The Rev. Wilmer Abbott, pastor of Felton Methodist Church, officiated. Interment in Barratt's Chapel Cemetery.

### Food Specialist Answers Bread Questions

What do you know about breads? Miss Janet Coblenz, foods and nutrition specialist with the University of Delaware, says the "staff of life" may be one of our most misunderstood food products. She lists some questions and answers ranging from ways to keep bread fresh to methods of slicing bread extra thin.

Q—Is it advisable to place a damp towel over tea sandwiches to keep them fresh when made up hours ahead of serving time?

A—No, because moisture spurs the growth of bacteria. Refrigeration—a better way of holding the made-up sandwiches—slows bacterial growth but does not stop it. For best results, sandwiches, if wrapped with moisture vapor proof material, can be refrigerated for several hours prior to serving.

Q—What is the best method for slicing bread extra thin, to make dainty tea sandwiches?

A—Wrap bread in moisture-vapor proof material and refrigerate until very cold or freeze. Then slice. You may purchase a special gadget that holds a slice of bread firm as you do the job.

Q—How can bakery rolls, soft-crusted dinner or sweet rolls be heated?

A—Heat 'em in a hurry atop the range. Put two tablespoons water in the bottom of a large skillet. Insert a trivet or wire rack, placing the rolls on it. For soft-crusted dinner rolls: Cover the skillet and place over low heat for eight minutes, or until rolls are hot. For frosted sweet rolls: Do NOT cover the skillet. Place rolls on rack or trivet, then place skillet over medium heat for five minutes, or until rolls are hot. The skillet method is the only satisfactory way of heating sweet rolls without melting the frosting. Rolls can always be heated in a 300 F. oven in 15 to 20 minutes. Moisten the inside of a paper bag used to hold rolls. If plastic wrapped, remove before placing in bag.

Q—What is the best way of keeping toast hot?

A—Arrange toast slices on a rack and place in a warm oven until served. Hot toast should never be stacked—unless you want to watch it wither. Toast may be lightly wrapped in a napkin before serving. The cloth will absorb the steam from the toast and keep it crisp.

Q—Does toasting change the caloric value of bread?

A—Toast has the same caloric value as untoasted bread—60 calories per one-half inch slice.

Q—Is it necessary to completely defrost bread which is to be used for toast?

A—No, just place pre-sliced bread in toaster, or defrost bread enough to slice and drop into toaster.

Q—Is there a low calorie bread?

A—No. The basic ingredients of bread—flour, sugar, salt, and small amount of fat cannot be varied greatly if a palatable product is made. The average slice of bread is 1/2 inch thick and contains approximately 63 calories. The average slice of most low calorie breads is less than 1/2 inch thick. Naturally, the slice will contain fewer calories. (The bulk of the calories of bread comes from flour and the amount of flour in bread cannot be varied.)

### Clean Bins Solves Grain Insect Problem

With corn and soybean harvest not far away, farmers are reminded that grain storage facilities need to be in first class condition before harvesting begins. George K. Vapaa, Kent County agent, says bins should be cleaned thoroughly and treated with a residual spray before attempting to store grain. He indicates all old grain, trash, feed sacks, and debris that furnish living quarters for insect should be removed. Ceilings and walls should be swept down thoroughly and a vacuum cleaner used to clean cracks. A good clean up job around the outside of the bins will also help to reduce the number of insects.

Walls should be sprayed with Methoxychlor or malathion (premium grade). A grain protectant can be added to the grain as it is placed in the bin. A commercial pyrethrum product is available for this purpose. All chemicals should be used according to the manufacturer's recommendations. Vapaa warns:

Screen out rats, mice and birds as they can take a heavy toll in the grain bin.

The less moisture present in the grain, the less attractive it is to insects, moles and bacteria. Only clean, sound grain with a moisture content of 12 per cent or less should be stored. Grain with a high moisture content attracts insects and may heat, the agent adds. Grain that is free of broken kernels is safer from insect damage than dirty, cracked grain.

Finally, Vapaa suggests that grain producers stop by his office in the next few days and pick up copies of the latest publications on grain storage problems.

#### Mrs. William E. Abel

Mrs. Carrie E. Abel, 82, widow of William E. Abel, died Thursday, Aug. 23, at her home near Masten's Corner. She was born near Felton.

She is survived by a son, John T. Harrington, and a brother,

### 4-H Foundation Provide \$1 Million For 4-H

More than half a hundred corporations, foundations and interested citizens provided over \$1 million through the National 4-H Service Committee for the support and advancement of the 4-H programs, according to the organization's 1961 annual report just released.

In the report, Chris L. Christensen, president of the Committee, says: "Those of us in the business and civic world regard 4-H work as an unusual educational program which embodies

the basic principles of free enterprise. We believe we have an obligation to help young people develop their abilities to the highest degree."

And, from the 4-H donor point-of-view, Raymond C. Firestone, president, Firestone Tire & Rubber Company, adds: "We are convinced that there is no better training ground than 4-H for the development of good citizenship, self-reliance, honest endeavor, respect for leadership and a cooperative attitude toward others."

Completing four decades of service to the youth movement, the nonprofit corporation reports average tenure of 4-H award donors at more than 17 years. Three firms have backed the 4-H movement for 40 years and two started their support in 1961.

The National 4-H Service Committee in cooperation with the extension service annually stages the National 4-H Club Congress and provides educational services nationally. It publishes a monthly magazine, National 4-H News; operates a 4-H merchandise serv-

ice, and maintains a year-round public information program.

The four propellers (screws) of the aircraft carrier RANGER each measure more than 22 feet in diameter, or the height of a

two-story building. The Navy's modern nuclear submarines can travel faster submerged than on the surface; they also can submerge in less than one minute.

### Good Boating Offered By Delaware Waters

Hundreds of boating enthusiasts, including many from neighboring states, spend countless dollars and travel many miles every weekend and vacation period throughout the summer and early fall to enjoy the excellent boating offered by Delaware waters, advises the Delaware State Development Department.

While "motorboaters"—of both inboard and outboard variety—are to be found on practically every one of Delaware's half a hundred ponds, lakes and navigable streams, their expenditures, travel and enthusiasm hardly match that of the "sailors," who weekly pit strength and skill against wind and tide and against the "know how" of skippers of other wind-propelled craft.

According to the Development Department, a majority of the "sailors" using Delaware waters favor the Indian River Bay, Rehoboth Bay and the Lower Bay, each of which provides sheltered areas offering sufficient space for effective use of sail.

At Riverdale, near the junction of the Indian River and Indian River Bay, is located the Indian River Yacht Club which regularly sponsors yachting competition. The Lewes Yacht Club sponsors similar competition throughout the summer in the generally calm Delaware Bay waters off Lewes Beach.

Several times during the season, these Delaware-based clubs compete with one another. For example, a renewal of this long-standing rivalry is scheduled for Saturday, Sept. 1, when the Indian River Yacht Club will be host to members of the Lewes Yacht Club in "sailfish" competition. The Sept. 1 competition has been divided into two divisions with juniors matching sail—and wits—at 2 p.m. Senior competition will get underway shortly after completion of the juniors event.

The Lewes "sailfish" fleet, comprising more than eighty of these small, trim, fast-moving craft, is believed to be the largest along the East coast and may be seen in competition off Lewes Beach any Sunday afternoon during the summer season.

Full scale regattas, involving larger craft are staged less frequently. In fact, only one more event of this nature remains on the 1962 Delaware yachting schedule.

The annual Indian River Invitational Regatta will be held in the Indian River Bay the weekend of Sept. 15-16. Sanctioned by the Chesapeake Bay Yacht Racing Association, the two-day competition is expected to attract entries from a seven-state area.

The September 15-16 competition will feature both "lightnings" and "penguins." The former are 19-foot, three-sail craft using mainsail, jib and spinnaker. It takes a skipper and a two-member crew to man a "lightning." The smaller "penguins" average 11 1/2 feet in length and have only a mainsail; they carry one crew member in addition to a skipper.

The Indian River Invitational gets underway at 10 o'clock the morning of Sat., Sept. 15, with additional races scheduled for 2 p.m. on the same day and at 11 a.m. on the 16th. The penguins will race on the inside course opposite Riverdale and the larger lightnings will race an extended outside course opposite Oak Orchard. Trophies will be awarded to the skipper of craft finishing first, second and third in each class.

Under the rules of the C.B.Y.R.A., the number of regattas that a member-club is permitted to stage is pretty much determined by the sailing proficiency of the club's members, regattas being assigned on the basis of points earned by clubs in earlier competition. That Indian River Yacht Club members have been holding their own in C.B.Y.R.A.-sanctioned competition is indicated by the fact that the I.R.Y.C. is planning five or more regattas for the 1963 season, including the Dixie District Championship Regatta, notes the Development Department.

#### Mrs. Minnie M. Coleman

Mrs. Minnie M. Coleman, 85, widow of Ross Coleman, died Wednesday, Aug. 22, at the Messick Nursing Home, Harrington. She was a native of Pennsylvania and had lived in the Greenwood area for the past 42 years.

Mrs. Coleman is survived by two daughters, Mrs. Helen Keyser, who lives in West Virginia, and Mrs. Margaret Montgomery, Pitman, N. J., and by a son, Ross, Greenwood.

Also surviving are six grandchildren and four great-grandchildren.

Funeral services were held Saturday from the Fleischer Funeral Home, Greenwood. Burial was at St. Johnstown Cemetery.

### Workshop in Programmed Instruction

In evidence that contemporary pioneering is not confined to outer space, the University of Delaware teaching resources center and division of extension will offer an opportunity this fall to explore one of the newest areas of educational endeavor in a workshop on programmed instruction.

Programmed instruction, points out Dr. David V. Guerin, director of the teaching resources center, is really a new method of taking advantage of a very old educational principle. "Despite the space-age sound of the term," says Dr. Guerin, "programmed instruction is simply the time-tested Socratic method in modern dress." It should more properly be called "programmed learning," he goes on, because it is fundamentally a means by which the student may apply to himself the questions by which he can lead himself to new information and new insights in any field of learning.

The point is that modern psychology has confirmed the intuitive understanding of Socrates that the most efficient learning of new information is developed through a series of carefully phrased questions that encourage the student to reason his way step by step through new material. "The student is fully involved in the process all along the way," says Dr. Guerin. "He can hardly avoid learning the desired material."

The teaching machines that have caught the public fancy and stirred public fears during recent years are nothing more than mechanical devices developed to facilitate programmed instruction. "But the machines are only part of the picture," Dr. Guerin warns, "and in the long run they may prove to be less important than the programmed textbooks now being published in increasing numbers."

The workshop to be offered this fall for university teachers, public school teachers and industrial training directors is intended as a practical introduction to the creation and evaluation of programmed materials. Students enrolled will pursue programming projects related to their professional fields, but, according to Dr. Guerin, it is not the object of the workshop to produce practicing programmers. "The most important result we expect from this introductory workshop is to give students critical standards by which they may competently evaluate the growing flood of programmed materials flowing from publishers and manufacturers of teaching machines. It is becoming increasingly important that teachers be able to discriminate among new developments in this still largely experimental area of instruction."

The workshop, which may be taken at either the graduate or undergraduate level for credit, will meet Friday evenings in Newark during the fall semester.

The staff of the workshop will include both University of Delaware faculty and visiting specialists from other institutions. The university group includes, in addition to Dr. Guerin, Dr. George H. Henry, professor of education; Dr. John A. Brown, professor of education; Dr. James B. Krause, associate professor of biological science; Dr. Lawrence W. Gulick, associate professor of psychology, and Miss Sarah M. Wiley, assistant of business administration. These faculty members were designated by the University last year to receive special training in programming and have been pursuing programming applications in their professional fields. Visiting lecturers will include Dr. Hugh M. Shafer, co-ordinator of learning resources, University of Pennsylvania; Maj. Franklin C. Butler, Jr., chief of auto-instructional research, and Maj. Arthur R. Stiger, chief of educational research, U. S. Air Force Academy; Dr. Nathan Lazar, programming specialist, Britannica Center for Studies in Learning; Dr. James S. Winston, manager of educational programs, RCA Educational Services; and Dr. Thomas D. Clemens, research co-ordinator, U. S. Office of Education.

Further information on the workshop as well as other courses and programs in university extension may be obtained from the Division of University Extension, University of Delaware, Newark; telephone ENdicott 8-8511, extension 220.

### Bench Show Winners

The Eastern Shore Foxhunters Association held a bench show Sun., Aug. 26, at its club house near Vernon, with 85 dogs entered.

The following dogs won trophies and reserve champion ribbons.

Champion coonhound, Maurice Adams, Harrington. Reserve champion coonhound, Paul Drummond, Middletown.

Reserve champion Beagle, Joe Baldwin, West Chester, Pa. Champion Walker foxhound, William Hervern, Townsend. Reserve champion, Walker foxhound, Jr. Wix, Harrington. Champion foxhound, Paul Drummond, Middletown. Reserve Champion foxhound, Paul Drummond, Middletown.

### How to Remove Grass Stains

A grass stain is easy to remove if you take prompt action and use the right method, according to Kent County home demonstration agent Katie Thomas. The method used will depend upon the washability of the fabric.

Remove any surface grass or foliage with the back of a dull knife. Then work from the wrong side of the fabric to force the stain out instead of imbedding it, she says.

For washable garments, work detergent into the stain. Liquid detergents are in a concentrated form and are easily worked into the fabric and rinsed out of it. If the stain is stubborn and remains after rinsing, use a bleach. Don't use a chlorine bleach on a wash-and-wear garment, cautions Mrs. Thomas. After removing the stain, wash the garment as usual.

For clothing that isn't washable, use alcohol instead of detergents and work from the wrong side of the fabric. Mrs. Thomas cautions that you should test the alcohol on a hidden part of the garment to be sure it's safe for the dye. Use as little alcohol as possible to avoid wetting a large area of the material. Use alcohol with extreme caution as it is poisonous and is flammable.

### Final O. K. on Primehook Refuge

The recent approval by the Migratory Bird Conservation Commission of the proposed National Wildlife Refuge on Sussex County's Primehook marshes authorizes the Bureau of Sport Fisheries and Wildlife to proceed with its plans for acquiring more than 11 thousand acres of land between Slaughter Beach and the Broadkill River, according to John S. Gottschalk, director of the Bureau's northeast region.

In describing the need that exists along the Atlantic coast for wetlands to be preserved for the benefit of migratory waterfowl, Gottschalk pointed out that the Primehook Marsh, which has long been recognized for the high quality waterfowl habitat it affords, is one of the few areas left along the Delaware-New Jersey coast that is easily susceptible to management as first class waterfowl habitat.

"The principal criteria used in selecting wetland areas to be developed as waterfowl refuges are the potential value as habitat and the vulnerability of the area to being converted for industrial use," Gottschalk said. "Although many marshes along the coast have been taken over by industries needing access to the sea," he said, "the Bureau knows of no plans for industrial development of the Primehook marshes such as might be inferred from the wording of the recent announcement from Washington of the Commission's action approving both the new refuge at Primehook and the enlargement of the Brigantine National Wildlife Refuge in New Jersey."

"We are now in a position to go ahead with our plans for the new refuge, negotiate with present owners of the lands involved, working closely with local interests whom we found to have more than an ordinary concern for the preservation of our wildlife resources."

### Hearing Set On Milk Orders

The U. S. Department of Agriculture has scheduled a joint public hearing in Philadelphia Sept. 13 to consider proposed amendments to the federal milk marketing orders for the Philadelphia, and Wilmington, marketing areas.

The hearing will convene at 10 a.m. in the Hotel Adelphia, 13th and Chestnut Streets, Philadelphia. It is being called to provide opportunity for revising some of the pooling, pricing and related milk order provisions.

Necessity for the hearing arises out of a recent Supreme Court ruling which invalidated a compensatory payment provision of the Federal milk order for the adjacent New York-New Jersey marketing area.

USDA has invited proposals from interested parties, and various proposed amendments have been submitted to the Department from producers and milk distributors. The proposals relate principally to co-ordination of pooling and pricing provisions of the two orders with other Federal orders for nearby markets—particularly the New York-New Jersey market.

All the specific proposals received call for amendment of only the Philadelphia order. At the hearing, however, there will be a general review, for any indicated revisions, of definitions under both orders for "producer milk," and plants regulated. Also pooling provisions in both orders will be reviewed as to their applicability to a regulated distributing plant which also meets pooling requirements under another Federal milk order.

One of the specific proposals for the hearing concerns the pricing of milk to a handler regulated by the Philadelphia order which is distributed in the New York-New Jersey marketing area. As proposed, the Philadelphia handler would pay for milk distributed in the New York-New

Jersey marketing area at the Philadelphia order Class I price, rather than at the New York-New Jersey order Class I-A price, as is presently provided.

Another proposal concerns the pricing of inter-market purchases and sales by a Philadelphia handler of milk from both the New York-New Jersey and the Philadelphia regulated markets.

It is also being proposed that the Philadelphia order be amended to provide for the regulation of a plant under the milk order for the marketing area in which the greater volume of fluid milk products is distributed from the plant.

After considering the hearing evidence, USDA may recommend amending the orders. Any amendments would be submitted to producers in each of the markets for approval prior to being put into effect.

### National Child Safety Week Sept. 5 to 12

Governor Elbert N. Carvel this week urged all Delawareans to join in the observance of National Child Safety Week, September 5 to 12, "by making our streets and highways safe for everyone, from the very young to the very old, not only during this special week but throughout the year."

In a statement issued at Dover the chief executive pointed out that "the re-opening of schools presents parents, teachers, school and public safety officials—and motorists—with the additional responsibility of taking every precaution towards reducing the heartbreaking toll of accidents involving students."

Governor Carvel also cited the efforts of the American Safety League which sponsors the National Child Safety Week observance.

The full text of the statement follows:

"The re-opening of school pre-

sents parents, teachers, school and public safety officials—and motorists—with the additional responsibility of taking every precaution towards reducing the heartbreaking toll of accidents involving students.

"In recognition of this, the American Safety League each year designates the first school week in September as National Child Safety Week and urges all Americans to participate by driving carefully by exercising special caution in school zones, near playgrounds and in other areas where groups of children may be active. Parents and teachers are also urged to stress the development of safe travel habits for all children under their care.

"I urge all Delawareans to join in the observance of National Child Safety Week, Sept. 5-12, by making our streets and highways safe for everyone, from the very young to the very old, not only during this special week but throughout the year.—Elbert N. Carvel.

### Veterans News QUESTIONS AND ANSWERS

Q—If the beneficiary of a GI insurance policy dies before the payment of the face value of the insurance is completed, who receives the balance of the payment on the claim?

A—The balance may be paid to the contingent beneficiary, to the estate of the beneficiary, or in some cases to the estate of the insured.

Q—What is being done for the so-called "veterans of Viet Nam" and other cold war flareups?

A—There are several pieces of legislation pending in Congress to provide additional benefits for these servicemen.

Q—What is the average age and the average yearly income of WW I veterans?

A—The average age is 68.1 and the average income, according to most recent Veterans Administration figures available is \$3,034.

# SPORTS

KEITH S. BURGESS — Sports Editor

## "Sports Odds And Ends"

Mannon "Mannie" Robinson, local harness driver reined five winners in nine races at Freehold, N. J., Raceway recently. The mounts and payoffs were: Titanite (\$16.60), Sword's Point (\$27.60), Wayne Direct (\$17.40), Grattan Pace (\$4.60), Americana Direct (\$9.40).

We wrote recently that Tom Landry, coach of the professional football New York Giants team has his charges run a mile in six minutes or less from time to time to build up their endurance. This is known as the "Landry Mile." John Stiegman of the University of Pennsylvania is another name coach, who subscribes to this theory. Stiegman set up a 6:30 goal for the Penn pigskin team and all but seven made the 5,280 feet in that time, the first crack out of the barrel.

Grace Butcher, a 30-year-old mother of two, from Chardon, O., has times of 2:18 for the half mile run and 5:04 for the mile run. Grace works out with the Chardon High cross-country team and always beats a few of the boys. We have relatives in Painesville, O., about 15 miles from Chardon, so we watched Grace win a distaff 880 in the Cleveland Arena a couple of years ago. She is continually badgering the A.A.U. to allow American women to run in longer races as the weaker sex does overseas. So far the desk-jockeys who control American sports have turned a deaf ear to her pleas.

Quick Lady, owned and driven by Harrington's Olin Davis won her third straight at Brandywine Raceway the other night. The six-year-old chestnut mare won by 1 1/2 lengths in 2:01 1/5 in a \$10,000 Invitational Pace.

Bob Gillette and Don Rothermel flew in from San Diego, Calif. this week after finishing Navy boot training. Gillette at 6 ft. 5 1/2 inches was one of the tallest basketball players ever at H.H.S. "Lefty" also competed in football, cross-country and track. He still holds the school javelin record at 148 feet.

Rothermel was a member of the Lions football, cross-country and baseball teams.

The Little League baseball boys were entertained at a swimming pool party at the American Legion Home Monday night. The affair was a success as most everyone appeared to be having a ball at the pool. League sponsors were the American Legion, the Lions Club, the Rotary Club and the Moose Lodge.

Football practice at H.H.S. started last Saturday. Sessions are held each morning at 10 a.m. Only six or eight players are showing up. To hazard a guess possibly some players are still out of town on vacation trips. Some others may be milking the last dollar out of vacation jobs. Harrington won't be a real football town until the August practice sessions are well attended.

## Jr. Football League News

At a recent meeting of the Harrington Junior Football League it was decided to make a few changes for the upcoming season.

One of these changes will allow those lads, who are members of the Harrington Junior High School team, to participate in the Junior League, also. The reasoning behind this move is the fact that boys young enough to play in the local league are used very sparingly on the school team. The age limits have been altered slightly. A boy must be 9 years old on or before Sept. 1st. At the upper end of the age bracket, a boy is eligible who is 13 years old on or after Sept. 1st. The weight limit is still 110 pounds.

Final registration day is Saturday the 8th of September. If enough boys turn out and finances permit the league will expand from three to four teams.

No evening practice is to last more than two hours. The nocturnal sessions must end by 8:15 p.m.

It is hoped that the lighted Moose Field will again be available for the second year of the league's operation.

Last year's play saw Tom Mulcahy's Eagles win the loop crown over the Bears and Colts. League officers are: Jack Swain, President; Jim Lobo, vice president; Doris Fry, secretary; Jack Redden, treasurer.

A Buddy Dean record hop will be held at the Harrington Arm-

ory Friday evening, Sept. 14 from 8 to 11 p.m. The affair will be well chaperoned and policed. A good turnout would ease the financial problems, considerably.

## C.K.R.T. Post To Sponsor Swim Meet

Plans have been completed for the first annual swim meet that will be held Sat., Sept. 1, at the American Legion Pool in Harrington, under the sponsorship of the Callaway, Kemp, Raughley, Tee, Post No. 7.

An interesting program has been planned for the children in all age groups. There will be many swimming and diving contests. Also a tube race for non-swimmers.

One of the highlights of the program is the costumed baby parade for children 5 years and under. The parade will be held at the pool area and will start at 1:30 p.m. If you are interested in having your child be a contestant and would like further information contact Mrs. Howell Hitchens, chairman of this event.

Ribbons will be awarded to the swimmers finishing first, second and third in their age group. Trophies will be presented to the ones compiling the most points in the swimming events, to the winners of the diving contests, and to the first place winners in all divisions of the baby parade. The presentation of all trophies and ribbons will be made at 2 p.m.

For the past two weeks the pool has been a scene of much activity. The children have been working very hard practicing their swimming and diving and getting in shape for the swim meet.

All eligible persons, who are interested in competing in any part of the program may obtain entry blanks from William Santo, lifeguard at the pool, Robert Jester, Mrs. Howell Hitchens or Mrs. Leonard Taylor.

On the same day, Sat., Sept. 1, at 7 p.m. there will be an adults only party.

All members of the American Legion, Legion Auxiliary, social members and guests are invited to attend.

The rain date for the swim meet and the baby parade is Monday, Sept. 3.

## Fishing Lines

### Salt Water Fishing

Bottom fishing for sea bass is furnishing fine sport for fishermen taking boats out of Indian River Inlet. The hard hitting black sea bass prefer deep water where there is a rocky bottom. Around old wrecks there is always good fishing for this voracious biter. Trolling in the ocean is only fair. However, it is expected to improve in the next few weeks.

Catches of trout from the Delaware Bay have definitely dropped off. Reports of fairly large fish are helping to compensate for small catches.

### Augustine Beach

Augustine Beach has been closed to swimming until further notice. The Board of Health deemed this action necessary after an extensive investigation by the Water Pollution Commission. Fishermen are not affected by the ban on swimming. Fish caught from the waters off the Augustine Beach area are perfectly safe to eat if cooked properly.

### Phillips Landing Access Area

In the southwest corner of Sussex County near Portsville, just barely in Delaware and situated on Broad Creek near its junction with the Nanticoke River is one of the most scenic and well equipped public access areas in the state.

There are two ramps for launching small boats, outdoor fireplaces and picnic tables to accommodate approximately 100 persons. The facilities have been developed in a two acre pine grove leased, free of charge, to the commission by its owner, Harley G. Hastings. In season, shad, bass, pickerel and striped bass furnish excellent fishing in Broad Creek and the Nanticoke River.

### Freshwater Fishing

Sixteen year-old Richard Bowley, of Chester, Pa., caught a seven-pound bass at Paynters Pond near Milton. Other public ponds where some nice bass are being caught are Horsey's Pond near Laurel and McCauley's Pond near Frederica.

### Best Bet for the Weekend

Novontown Pond—near Mid-dletown—Largemouth bass.

## Softball News

Stone's Hotel was in action in all three contests played in the Harrington Softball League since the last writing.

The Hotelmen upended the league-leading Ruritan club by 11-5 and split two games with Bill's Barber Shop. Stone's won by 10-4 and lost by 7-6. The Barbers and the Hotelmen are still tied for second place as of the end of Monday night's play.

**RESULTS**

Stone's 11 - Ruritan 5  
 Bill's Barbers 7 - Stone's 6  
 Bill's Barbers 4 - Stone's 10

**STANDINGS**

Team	W	L
Ruritan	18	5
Stone's	12	11
Bill's Barbers	12	11
Jaycees	4	19

## Jr. Football Uniforms To Be Distributed Sept. 1

All boys who are interested in playing Jr. Football this fall are requested to register, Sat., Sept. 1. Registration will be from ten to eleven a.m. Registration fee is \$2.

Uniforms will be given out this Saturday. Practice sessions this season are from 6 p.m. to 8:15 p.m.

## Golf Exhibition

Jimmy Thompson, claimed to be golf's all-time long hitter, will give an exhibition Sun., Sept. 12, at Shawnee Country Club near Milford.

He will play nine holes at 3 p.m., and conduct a clinic at 6 o'clock. All are invited.

## "LOLITA" At Reese Sept. 6 - 8

The "count-down" is on a simulated ride in space is all set for the family this Friday and Saturday, Aug. 31 and Sept. 1, at the Reese Theatre. The first all-family space festival zooms thru the atmosphere with a trip to "The Phantom Planet" with Dev Dutton and Carol Mason in "Assignment Outer Space," a newspaper yarn of the great beyond. In addition, "Tom and Jerry" and "The Three Stooges" go into orbit. It's adventure, desire, fears, all rolled into one all gigantic space show.

Everyone, one time or another, wants to see the unusual. Such an unusual treat graces the Reese Theatre screen Sunday and Monday, Sept. 2 & 3. Jane Mansfield and Bob Mathias are featured stars in the new 20th Century Fox presentation, "It Happened in Athens," a story of the first Olympic games. Vincent Price in "Confessions of an Opium Eater" is the co-feature of this most unusual combination show.

Everyone is saying, "How did they ever make a movie of 'Lolita'?" MGM has accomplished the feat and critics say they have come up with one of the most sensational movies in many a day. "Lolita" plays the Reese Thurs., Fri., and Sat., Sept. 6, 7, and 8. On Saturday, Sept. 8, at 2:30 p.m., an entirely different show will be presented for the children with "Lolita" starting at 4 p.m., for persons 18 and over.

## L.O.O.M. NOTES

(Continued from Page One)

our Lodge will be installed as secretary of the Seventh District. Installing officers will be Lester Moore, of Salisbury, who is Deputy Supreme Governor of the Maryland, Delaware and District of Columbia Moose Association, and Jack Parker, also of Salisbury, who is junior vice president of the Association.

At our next regular meeting which will be on Tuesday night, Sept. 11, Brother George Aten, who is the state director of the Maryland, Delaware and District of Columbia Moose Association will be a guest speaker at our Lodge.

Used clothing was donated to our clothing bank this week by Mr. and Mrs. William Scott, of Hickman.

August 27: Mr. and Mrs. Allen Vickers, of Millsboro, a boy.

**BE WISE — ADVERTISE SHOP AND SWAP IN THE WANT ADS**

## CONVENTION

(Continued from Page 1)

60 in rural New Castle County, then Wilmington's 30 votes would be his.

Kent and Sussex delegates were willing to back the Wilmington and New Castle caucus choices.

Balick, a Wilmington resident who had been campaigning among the delegates in the morning had to rest his chances on the New Castle County caucus.

In that caucus, Francis X. Norton, Brandywine Hundred Democratic chairman, proposed New Castle County cast 60 votes for Biggs, who lives just outside the city limits.

A voice vote was taken and Chairman Frank O'Donnell ruled the eyes had it. That was challenged, and the roll was called.

The result: for the unit vote 35, against 24 and 1 absent.

Thus on the showdown, Balick's last-minute effort to win the nomination failed by only seven votes out of 60, although there was no assurance Balick would have gotten all 24 votes.

His effort was hampered by the fact that he was working against the allocation made by the Democratic State Policy Committee. The committee weeks ago allocated the nominations for attorney general and for congressman to rural New Castle County, for treasurer and auditor to Kent and for insurance commissioner to Sussex. The action favored the four incumbents and Biggs.

The convention got underway at 10:40 a.m. in the \$800,000 air-conditioned, soft-seated auditorium of Dover High School.

Democratic State Chairman John M. Conway presided. After a speech by Governor Elbert N. Carver, there was time for politicking and socializing during the roll call of the 210 delegates.

Then came the caucuses, followed by lunch.

In the afternoon, the convention got down to the formalities of carrying out the decisions already reached.

The convention had nominated all its candidates before John M. Bailey, Democratic national chairman, arrived to give the keynote address. He was introduced by William S. Potter, Democratic national committeeman for Delaware.

The acceptance speeches were brief. McDowell said he will run on his record and challenged his opponent, Wilmer F. (Rudy) Williams, to debate the issues.

Biggs said he is making no promise to carry on investigations of state agencies.

"To do so would injure persons who have done no harm," he added.

The convention ended almost without an audience because after the acceptance speeches the New Castle County group had to caucus to elect its members on the Democratic State Committee.

In the selection of state committee members from New Castle County, forces of State Sen. Calvin R. McCullough, D-Holloway Terrace, scored a minor victory by knocking William Cross off the committee and substituting Leon Heller.

No attempt was made by the McCullough people to eliminate Rep. James R. Quigley, D-New Castle Hundred, who was re-elected.

Finally, all the state committee members were announced, the benediction was given and the convention adjourned at 5:40 p.m.

## SBA Increase Size Standard

The Small Business Administration has increased its size standard to make additional manufacturers of cotton broad-woven fabrics eligible for SBA loans, Edward N. Rosa, Regional Director of the agency's Philadelphia office, announced this week.

Effective immediately, the size standard as it applies to loans includes firms employing not more than 1000 persons. The previous limitation was 750 employees. The firms must also be independently owned and operated and not dominant in their field.

This action increasing the size standard for loans followed consideration of testimony by interested firms and individuals on a proposed change published by SBA in the Federal Register of April 11.

The size standard for this industry for SBA assistance in obtaining government prime contracts or subcontracts remains unchanged, Mr. Rosa said. For this purpose, manufacturers of cotton broad-woven fabrics are considered small if they are independently owned and operated, not dominant in their field, and employ no more than 500 persons.

As part of the contracts assistance program, SBA and military and civilian purchasing agencies jointly set aside proposed government contracts or portions of contracts for exclusive competitive bidding by small firms.

## NOMA Plans Year's Activities

Monday, Aug. 20, the officers and committee chairmen of Delmarva Chapter of NOMA met in Salisbury to plan the program for 1962-1963.

The programs planned will be of interest to management people of all types of business organizations—both large and small.

NOMA is an organization primarily interested in improving the skills of management people to help them do a better job for their employers and the people they supervise. It is an educational organization and not a civic or fraternal club. They do not have any axes to grind.

Programs on the subjects of labor relations, human relations, taxes, management problems and business psychology are planned. The meetings will be held the fourth Monday of each month rotating between four locations—Salisbury, Easton, Seaford and Cambridge.

The officers are Gordon Weitzel of Wayne Pump, Salisbury, president; E. D. Fleetwood, Jr., J. McKenny Willis, Easton, vice-president; Mrs. Mildred P. Minner, Delaware Electric Cooperative, Inc., Greenwood, secretary, and Harvey Nelson, Harvey Nelson Associates, Salisbury, treasurer.

## No Crew Cut For Your Lawn

Don't give your lawn a crew cut when you return from vacation, warns George Vapaa, Kent County agent. A close cut in hot weather—especially after the grass has grown tall—is likely to burn out and kill or weaken most grasses, especially bluegrass.

The first mowing after you return from vacation might be a trim of just an inch or two if the grass is four to five inches tall. Then, after three to five days, mow to a height of about two inches, Vapaa recommends. The heavy clippings from tall grass should be removed so the grass will not be smothered.

Cool-season grasses should be kept about two inches high. This helps hold down competing weeds, particularly crabgrass seedlings which are discouraged by the shade of taller grass.

Mow often, the agent suggests, even though only a little top growth is removed at a time. And, whatever kind of mower you use, have the blades sharp to avoid bruising or tearing the grass.

## Delaware State Museum News

### Button Collection

An extensive collection of buttons, assembled and framed for exhibition, by Miss Ethelwyn J. Maloney has been given to the Museum by her. There are 118 glass covered, wooden frames with cardboard inserts on which are mounted hundreds of buttons, insignia and explanatory information.

The collection includes too many different types of buttons to be described here in detail, as there are dress buttons, historic buttons, uniform buttons, mythological buttons, pick back and nu-

merous other categories. Part of the collection, mounted on stands, has been on exhibit in No. 2 building and has been changed to add variety. Several of the frames were loaned to the Milford Historical Society for a day exhibit at a Silver Tea given in the Parson Thorne House on June 2.

It is evident that Miss Maloney spent considerable time and effort contacting people from all walks of life in the many years she spent assembling the splendid collection. She has exhibited some of the buttons in a number of shows and has received several prizes. The Museum is grateful for her generosity.

### Watch Exhibits

Several of the pocket watches from the Museum's collection were exhibited during this quarter in No. 1 building along with fourteen watch papers. A watch formerly owned by Robert W. Reynolds and later by his son, Governor Robert J. Reynolds, contained nine of the watch papers on exhibit as well as one still in the watch or ten in all. A silver watch owned by Capt. Jonathan Dennis Cathell of Portsville, and a gold key-wind watch and chateleine belonging to the Lockerman family of Dover are among the fine watches exhibited. A watch encased in a silver banded glass ball with the works exposed in the center and Roman numerals around them is unusual. Another significant watch is one that has six separate dials that

tell time in Paris, Constantinople, London, New York, Rome and Petersburg, and also has a second hand dial at the bottom.

Before the middle of the 18th century it became the custom to place a small circular piece of either fabric or paper between the inner and outer cases of watches. These discs acted as a cushion to protect the works of the watch from dust and shock. One of the early inserts on exhibit is one depicting Moses and the Ten Commandments, which was in the Lockerman watch. Some were embellished by young women and became sentimental tokens to be given to a friend or relative.

Watchmakers soon realized that these small discs could be used as a means of advertising, and the custom arose of watchmakers inserting their own papers to advertise their businesses whenever watches were repaired or cleaned. These watch papers were engraved, lithographed, and printed and their use continued until the 1870's. It was not uncommon for the watchmaker to write the date of repairs, and even the price, on the back of the paper in a watch. Very often several watchpapers, advertising different craftsmen would be found in one watch as is illustrated by the Governor Reynolds' watch.
