

P. S. & W. Railroad Depot, Harrington, Del.

ABOUT 1909—This photo shows the local station about 1909. The engraving was made from a picture made by Parsons Studio, Harrington. The picture was made from a postcard addressed to William Wells, Harrington. The card was lent to The Journal by Howard J. (Duck) Benson, a colored hand who works on the Pennsylvania Railroad. Duck worked for the Quartermaster Corps during World War II and was in the African campaign, Normandy, Northern France, Rhineland, Central Europe and the Ardennes campaign. He was also a prisoner of War in this campaign.

New Railroad Transportation Rates Reported

Savings of \$1 million to \$3 million a year to Delmarva and its poultry industry will result from new railroad transportation rates on feed ingredients coming into Delmarva. These go into effect in October, it was reported by William R. Stephens of Bridgeville, vice-president of the Delmarva Poultry Industry, Inc., and a member of the poultry association's transportation committee.

His report highlighted the association's regular September meeting of its Board of Directors held in Salisbury last week.

Stephens told the 52 poultry industry leaders present at the meeting that the new savings were in addition to a million-dollar-a-year rate reduction on corn shipped from the Midwest that the poultry association's transportation committee had been able to obtain a year ago. The new rate adjustments are on shipments of soybean meal, corn gluten meal, alfalfa meal and other poultry feed ingredients. They will make a difference of \$3 to \$5 a ton in feed costs, Stephens predicted, and will greatly strengthen Delmarva's competitive position with relation to southern broiler areas.

Feature speaker of the evening was Dr. Morris S. Cover, chairman of the poultry department at the University of Delaware. He reported on preliminary progress of the new area-wide poultry health program sponsored by the Delmarva Poultry Industry Association. A total of six poultry companies are cooperating in the test so far, together with poultry health specialists of the Universities of Maryland and Delaware and with the State Boards of Agriculture. Some 400,000 chickens are involved in the tests at present.

Cover said that results of the tests would not be conclusive until early next year. They are designed to test methods for improved control of troublesome respiratory problems in some flocks. If successful, the methods will be widely adapted in many U. S. poultry areas, it was predicted.

Paul Phillips of Mardela Springs, Md., chairman of the poultry association's grower committee and a member of its directors on the status of the poultry-growing and poultry-processing complex which a western Pennsylvania group is trying to set up at New Castle, Pa., using government loans for their capital.

Phillips said that increasing opposition to granting the loan was being voiced by many U.S. Senators and Congressmen because it would aggravate problems of the broiler-fryer industry, already facing surplus troubles, and would tend to throw people out of work in existing broiler areas. He noted that the unemployment problems in the New Castle area, used as one of the arguments to get a federal loan by promoters of the venture, had become almost non-existent! The unemployment rate has dropped to 3.1% in the area, according to Penna. Dept. of Labor and Commerce figures, Phillips said. This is almost a third below the national unemployment figure of 4.5% this summer and even more than that below the rate of unemployment in some of the poultry states which would be affected by the proposed new government financed project.

Phillips made a personal prediction that the loan application would be denied this fall unless President Johnson decided to step into the controversy on the side of the New Castle promoters. Poultry industry directors at the Salisbury meeting also heard

a report from association vice-president Tom Whittington, Jr., of Marion Station, Md., on progress to date in tests of different broiler strains underway at the University of Delaware experimental farm at Georgetown. The tests are sponsored and partly financed by the Delmarva Poultry Industry Association and its hatchery committee and designed to check fertility, hatchability, feed efficiency and other factors in poultry production to determine which of ten strains of chicks widely used by Delmarva growers perform best in each phase of poultry growing.

Jerry Truitt, Jr., of Salisbury, vice-chairman of the association's educational programs committee, reported on meetings, seminars and workshops planned this fall on the Peninsula to promote more widespread use and understanding of the latest scientific advances in poultry production and marketing. Four such gatherings are planned for poultry growers, servicemen and processors during late September and October, he noted, with additional ones planned later in the fall.

One of the highlights of the Salisbury meeting was presentation of a large silver bowl to Mrs. Howard Morris of Georgetown, William R. Murray, of Frankford, president of Delmarva Poultry Industry, Inc. made the presentation. He said that the entire poultry industry in the Peninsula was grateful to Mrs. Morris for her untiring devotion to the work of the industry's association and for the valuable help she had given to it through her detailed and comprehensive understanding of its activities during the past three years Mrs. Morris has been assistant executive secretary for Delmarva Poultry Industry, Inc., and three years ago was awarded its annual Medal of Achievement.

Sewing Contest Open To Delawareans

The annual Make-It-Yourself-With-Wool contest is open to all Delaware women and girls over 10 years of age according to Mrs. Edward S. Foster, Newark, state contest director.

Sponsored nationally by the American Wool Council and the Women's Auxiliary to the National Wool Growers, the contest is sponsored in Delaware by the Delaware Sheep and Wool Association.

There will be four divisions in the state competition. Adults over 22 years of age, seniors from 17 to 22, and juniors from 14 to 17 may enter dresses, suits, coats or complete costumes. Girls from 10 to 13 years of age may enter kirts or jumpers.

State winners in the junior and senior divisions will compete in the area contest. Area winners will enter the national contest held in Portland, Ore., on Jan. 20, 1966.

All contest entries must be made of 100 per cent domestic wool and must have been sewn since Feb. 1. The state style show and judging will take place Saturday, Dec. 4, in the Agricultural Hall auditorium at the University of Delaware. Several prizes will be awarded to contestants in each division.

A special meeting to show contestants the techniques of sewing with wool will be held November 3 at 7:30 p.m. in room 032, Agriculture Hall. Miss Janet Reed, extension clothing and textile specialist at the University of Delaware, will conduct the session.

District Sales Manager Named For PRR

Clifton O. Nock will become district sales manager of the Pennsylvania Railroad and Baltimore and Eastern Railroad at Wilmington, Oct. 1 when he succeeds R. F. Meyer, William S. Merrick, regional sales manager at Philadelphia, announced Monday.

Mr. Meyer, at Wilmington since 1951, first as division freight agent and since 1955 as district sales manager, is retiring after 46 years with the Pennsylvania.

In replacing Mr. Meyer, Mr. Nock, now manager of foreign freight sales at Philadelphia, is returning to the office where he began his railroad career as a clerk in 1927, and his territory will include much of his native Eastern Shore, being born at Hallwood, Accomac County, Va.

Mr. Nock's entire career has been in the sales department. After holding several clerical positions in the Wilmington office, he became a freight representative, serving at Baltimore, Norfolk, Philadelphia and Washington.

He was promoted to special agent at Washington in 1949 and served in that capacity until 1957 when he became manager of foreign freight sales.

A graduate of Goldey Business College in Wilmington, Mr. Nock married a Wilmington girl, the former Nellie Ebert in 1930. They have three children. Mr. Nock's father was a farmer and later was associated with the canning industry on the Eastern Shore.

Mr. Meyer, a native of Fort Wayne, Ind., joined the railroad freight department there as a stenographer in 1919. A series of promotions saw him serving in various capacities at Cincinnati, Toledo, St. Louis and Chicago. In 1948 he became a division freight agent-special duty at Philadelphia and in 1951 was transferred to Wilmington.

Mr. Meyer is widely recognized throughout the Wilmington and the Eastern Shore areas as one of the best informed experts on railroad and industrial traffic matters.

Veteran's News

Florida and Arizona are the only states expected to have more war veteran residents in 1980 than in 1960, Leon Fields, manager of the Regional Office of the Veterans Administration, Wilmington, said this week. This information is based on estimates prepared by the Research Statistics Service of the office of the VA Controller.

Florida's war veteran population is expected to increase approximately 39 per cent during the 20-year period, while Arizona's would increase about 17 per cent.

Net migration gains in war veteran population are projected for 13 other states, but the gains from migration would be too small to offset their losses from veteran deaths.

These states are: Arkansas, California, Colorado, Connecticut, Delaware, Louisiana, Maryland, Nevada, New Hampshire, New Jersey, New Mexico, Oregon and Wisconsin.

The records indicate that the estimated Delaware Veteran Population is now 56,000. A recent Bureau of the Census report shows that the total Delaware population has increased to 505,000. This would indicate there has been a corresponding increase in veteran population.

The other 35 states and the District of Columbia would have net migration losses from 1960 to 1980, Mr. Fields said the statistics show.

In addition to Florida and Arizona, the next largest net migration gains are expected to occur in Nevada, 13.8%; California, 13.1%; Arkansas, 5.5%, and Oregon, 5%.

The largest net migration losses are estimated as follows: Hawaii, 28%; District of Columbia, 17.8%; North Dakota, 17.2%; Rhode Island, 13.8%; Nebraska, 13.1%; South Dakota, 12.7%;

Thomas W. O'Day

Thomas W. O'Day, 85, a retired farmer of Felton, died last Friday morning at his home.

He was the husband of the late Mrs. Annie M. O'Day.

Surviving are four sons, Elmer and Norman, of Felton; Roland, of Plant City, Fla., and Lester, of Center Moriches, N. Y.; three daughters, Miss Dorothy O'Day, of Felton; Mrs. Helen Thompson, of Viola, and Mrs. Louise Biddle, of Dover; a sister, Mrs. Laura Maloney, of Denton, Md.; 12 grandchildren and five great-grandchildren.

Services were held Tuesday afternoon at the Berry Funeral Home, Felton, with interment at Barratt's Chapel.

Undergraduates At U. of D. To Receive Photos

University of Delaware undergraduates will receive a surprise package in the mail next week—an aerial photo of their homes.

The homes won't necessarily be distinguishable since the photographs were taken from a high altitude.

They appear in the September issue of "Scientific American," devoted entirely to a study of cities, which will be distributed to all undergraduates.

Along with a letter from University President John A. Perkins, the 280-page special edition is an introduction to a responsibility set forth for each student this year—"to be much better acquainted with the urban society of which you will inevitably be a part."

The series of aerial photographs is one of the striking features of the special issue. They take in an area from New York City's Manhattan to Washington, D. C., and Potomac River.

The photos are so clear that the White House can be seen. Wilmington, Philadelphia, and Baltimore also appear. Delaware Park's mile-long oval takes about one-eighth of an inch in the five page spread.

Most of the university's 5,000-plus undergraduates come from the areas pictured.

"By 1980," President Perkins said, "more than 80 per cent, or about 235 million, of the people in the United States will be living in 300 major metropolitan areas. Physical problems of land use, highways, mass transportation, and water supply will become much more acute than they are today. Human problems of race relations, housing, employment, education, and welfare must also be coped with."

"Most of you, upon leaving this campus, will take up residence in an urban environment. Your business or profession is even more likely to be practiced in a city. Part of the general education you should acquire is an understanding in depth of the complex metropolis. To this end, a number of endeavors—will be undertaken on our campus this academic year. By June you will have had the opportunity to be much better acquainted with the urban society of which you will inevitably be a part."

University officials said this was probably the first attempt by a college or university to involve an entire undergraduate community in such a project.

A committee of university personnel—both faculty and administrative staff—will map out a program of activities designed to bring students up to date on the problems and responsibilities to be faced by the increasingly urban civilization in which they will live and work.

The program from now until June will include distinguished visiting speakers on some phase of urban life, a colloquium on urban life to which nationally known speakers will be invited, special events in residence halls, field trips to nearby major communities to see some of the problems first hand, film, pertinent displays and collections at the university's Hugh M. Morris Library and Student Center, and participation in community and service functions.

Coordinating the planning and execution of the program will be the Division of Urban Affairs, which has pioneered in its area since it was established four years ago by a grant from the Ford Foundation.

Announcing the program at the university's Convocation ceremonies Monday morning, President Perkins said, "I hope each copy of the 'Scientific American' will be intensely read. Hopefully, the contents will be discussed among students and faculty. Such read and discussion will give you background against which to appreciate the other subsequent activities dealing with urban life which are planned for the college year 1965-66.

"If each student makes special effort to participate in the program developed during the year, a significant enrichment of his education here will result. He will graduate better prepared for the life he will live."

The magazine contains articles by authorities in the field—examining the history and evolution of cities, examples of planned communities, urbanization projections, land uses, transportation and other aspects.

Kingsley Davis, professor of sociology and director of International Population and Urban Research at the University of California, Berkeley, in the lead article, notes that "In 1960, nearly 52 million Americans lived in only 16 urbanized areas. Together these areas covered less land than one of the smaller counties of Arizona."

Among other authors in the magazine are Gideon Sjoborg, associate professor of sociology at the University of Texas; Hans Blumenfeld, lecturer at the School of Town and Regional Planning at the University of

Social Security Notes

by W. J. Bulkley

Several important changes in the social security disability program were included in the 1965 amendments. These involve a change in the law's disability definition, as well as others.

In the past disability benefits could be paid only to a person whose disability was expected to be "of long-continued and indefinite duration."

Now, a worker will be able to get disability benefits if his impairment is expected to last 12 calendar months, even if he is expected to recover in the future.

However, under the new law as under the old, a worker is considered disabled only if he is unable to perform any substantial gainful activity because of his impairment. (However, a blind person 65 or older may be considered disabled if he is unable to perform his usual work.) There is no change in the degree of impairment considered to be disabling.

Benefits payable by reason of this change in the definition of disability will be paid beginning with benefits for September 1965.

Workers under 62 who become entitled after 1965 to social security disability insurance payments and workmen's compensation benefits may be affected by a new offset provision in the law. This provision prevents a disabled worker from getting more in total benefit payments than he earned before he became disabled.

The offset provision requires that the social security benefit be reduced so that the combined benefit (social security and workmen's compensation) does not exceed 80 per cent of average monthly earnings from covered work before the worker was disabled.

For instance a worker with a wife and child under 18, and average earnings of \$450 a month, is disabled and qualifies for both types of benefits, his workmen's compensation is set at \$208 a month. His own social security disability benefit is \$140 and his wife and child each get \$70, for a total family social security benefit of \$280 a month. The two types of benefits total \$488 a month. His average earnings of \$450 a month are less than his total benefit payment. Eighty per cent of this average earnings is \$360. Therefore, the family social security benefit is reduced to \$152 a month so that the total amount payable in benefits is no more than 80 per cent of average earnings.

Another change in the law permits a person who has started receiving retirement benefits to become eligible for monthly disability payments, if he becomes disabled before reaching age 65. Previously, a person who had reached age 62 and started receiving retirement benefits could not become eligible for disability payments even if he became disabled before reaching age 65.

Retirement benefits started before age 65 are reduced to take into account the fact that they will be paid over a longer period. If a person qualifies for disability benefits after he has started receiving reduced old-age benefits, his disability payments also will be reduced to take into account the months he received the other benefit. If there is a reduction in the disability payment for this reason, it will generally be less than the reduction in old-age benefits.

Two provisions will affect blind people. One eases the work requirements for young people who are disabled by blindness. Under this provision, a blind worker who is disabled before he reaches 31 will be insured if he has worked about one-half of the time after he reached age 21 and before his disability began. A minimum of one and one-half years of work is needed by young people who become blind before they are 24.

The second provision affects the blind worker 55 years of age or over. Such a worker may now be eligible for monthly payments if he is unable to engage in his former occupation. Under the old law he could receive benefits only if he was unable to perform any substantial gainful work.

Under the new law, as under the old, benefits cannot be paid if he is actually engaging in substantial gainful activity despite his blindness.

Benefits payable by reason of these changes affecting the blind will be payable beginning with September 1965.

I suggest that if you have any questions about your rights or responsibilities under the social security law you write, phone, or visit the Dover District Office, located at 230 West Lookerman Street. The telephone number is 736-1426.

Armed Forces Notes

Army Pfc. Kenneth L. Black, 23, whose wife, Carolyn, lives at 9 Mill Rd., Wyoming, is a member of the 37th Artillery's Battery C which was honored in ceremonies Aug. 19 as the 2nd Howitzer Battalion's outstanding firing battery for 1965.

The battery was chosen for its efficiency in fire support exercises and ability to mobilize rapidly. Black, a mechanic, entered the Army in October, 1964 and completed basic training at Ft. Gordon, Ga. He arrived overseas last February.

Black was graduated from Caesar Rodney High School, Camden, in 1959. His parents, Mr. and Mrs. Earl Black, live on Route 1, Dover.

Technical Sergeant Hance C. Storus, son of T. H. Storus, of Harrington, is at Fairchild AFB, Wash., for the Strategic Air Command (SAC) "World Series" bombing and navigation competition.

The sergeant, a graduate of Caesar Rodney High School, in Camden, attended Wesley Junior College, Dover, and the University of Delaware, Newark.

His wife, Claudine, is the daughter of Mrs. G. C. Wallace, of Magdalena, N. M.

Pvt. Sylvester S. Wilson Jr., whose parents live on Route 2, Box 179, Smyrna, completed a Little John and Honest John missile crewman course at the Army Artillery and Missile Center, Ft. Sill, Okla., Sept. 16.

During the eight-week course Wilson received instruction in the loading, preparation and firing of these troop support missiles.

He entered the Army last May and completed basic training at Ft. Jackson, S. C.

The 21-year-old soldier was graduated in 1962 from William Henry Comprehensive High School in Dover.

Army Pvt. George A. Pierson, son of Mr. and Mrs. Clyde D. Lockwood, Magnolia, completed a light vehicle driver course at Ft. Jackson, S. C., Sept. 16.

During the course Pierson received instruction in the operation and maintenance of military vehicles up to and including the two and one-half ton truck.

The 21-year-old soldier entered the Army in May, 1965 and completed basic training at Ft. Jackson, S. C.

He attended Caesar Rodney High School, Camden.

Kent Bookmobile On New Schedule

The Kent County bookmobile is now operating on a new schedule. The new arrangement guarantees that each stop will be visited twice a month, on the same day of the week, and at the same hour.

The schedule is as follows: Adamsville—2nd and 4th Tuesday, 10:30 - 11:15. Farmington — 2nd and 4th Tuesday, 9:45 - 10:15. Felton — 1st and 3rd Wednesday, 1:30 - 4:00. Frederica — 1st and 3rd Wednesday, 11:00 - 12:00. Harrington — 2nd and 4th Tuesday, 1:30 - 4:00. Houston — 2nd and 4th Wednesday, 1:30 - 2:15. Sandtown — 1st and 3rd Monday, 10:30 - 11:00. Vernon — 2nd and 4th Tuesday, 10:45 - 11:15. Viola — 1st and 3rd Monday, 11:30 - 12:00. Williamsville — 2nd and 4th Wednesday, 2:30 - 4:00.

Scout Board To Acquire Land For Service Center

The executive board of the Del-Mar-Va Council, Boy Scouts of America, at its Sept. 16 meeting authorized its Service Center Committee to proceed to acquire land for a new office and Service Center. Walter O. Simon, chairman, reported to the Board that several center-city properties have been offered to the Council and the committee feels that a suitable tract can be obtained. The National Engineering Service of the Boy Scouts of America is in consultation with the Committee. When an adequate tract is obtained the present property at 1012 Jefferson Street will be sold, the proceeds to be applied against the purchase price of the new location.

"The staff and operating personnel have been overcrowded for years" Council President, Dorsey B. Kinnamon, told the meeting last Thursday at Wesley College, Dover. "Some of the field staff is already in a separate location. Present quarters have been used since 1948 when there were only half as many staff members".

Directors and committee chairmen were also informed that the Jefferson Street Center is now open Saturday morning from 9 a.m. to noon as an expanded service to volunteers unable to visit during the weekday 8 a.m. to 5:30 p.m. schedule.

Full programs and a new schedule for operating committees were also adopted as the 200 man coordinated meeting went into high gear for 1965-1966.

The revised schedule calls for board meetings as follows: Oct. 21, at Howard Johnson's, Route 896 in Newark; Nov. 18 at Howard Johnson's, Hare's Corner; Jan. 20, Howard Johnson's at Newark; Feb. 17, Howard Johnson's at Hare's Corner; May 12, Howard Johnson's at Hare's Corner and June 16 to be announced. The July 21 meeting will be held at Rodney Scout Reservation and August 4 at Nanticoke Reservation.

The coordinated meeting, which includes seven operating committees, will meet: Nov. 11 and January 13, both times at Wesley College, May 5 at Delaware State College and with other important dates scheduled for Sun., March 13, at 2:30 p.m., Wesley College, the annual budget and planning conference for the entire council; April 16 in Salisbury, the annual dinner; June, July and August meetings of the committees will be at call of the chairmen.
