**MOTHERS DAY** 

A teacher had just given her primary grade class a science lesson on magnets. In the follow-up tests, one Rainchecks At question read: "My name starts with "M", has six Little Lincoln letters, and I pick up things. What am I?"

She was a bit surprised to find half the class answered the question with the word "Mother."

The world needed someone To brighten each day, Someone with courage To chase clouds away.

The world needed laughter, The world needed love, And none knew it more Than our Father above!

And so He made mothers To help us to grow. To guide our small feet In the way they should go.

To share our heart's dreams And to see them come true, To comfort and love us In all that we do!

And there is a mother That none can outshine-God bless you and keep you Dear Mother of mine.
