## WHO'S **NEWS** THIS

By LEMUEL F. PARTON

NEW YORK.—It is perhaps just as well that Crosby Gaige is a bachelor. He drags home 200,000 patent models, including a corpse Bachelor Has preserver, hog-catcher, burglar

200,000 Odd alarm, an early Hoe printing Gadgets press, a dentist's chair, a machine gun, an egg-beat-

er, an engine, a steamboat, a pretzel-bending machine—and so on and on. The patent office models had been gathered by the late Sir Henry Wellcome and kept at his estate in 3,251

packing cases. Mr. Gaige bought A friend of this writer, remembering with remorse he hadn't bought a birthday present for his wife, stepped into an auction room. He became confused and bought

ten barrels of tin cookie cutters. It

almost broke up his home. Mr.

Gaige will have no such trouble. Mr. Gaige was born the son of the postmaster at Skunk Hollow, N. Y., and became a Broadway theatrical producer, with a 300-acre estate at Peekskill on the Hudson, where he indulges his taste for knickknacks such as the above, but with more discrimination than this

He is a gourmet, with 300 cook books in his kitchen, has a de luxe machine shop where he makes art objects, is a master of viticulture and a maker and connoisseur of beautiful wines.

ensemble suggests.

He has cattle folds and breeds blooded cattle, a printing plant where he prints typographical knock-outs in limited editions, a huge library with 5,000 reference books, and is distinguished both as a bibliophile and a cook—one of the best cooks in the world, his friends say.

All these concerns are merely extra-curricular. In his 29 years on Broadway, he has Theaters hit off his full Out of Red share of successes, for 29 Years built three theaters and kept steadily out of the red. In Colum-

bia university, he wrote the 1903 varsity show, "Illusia." He got a job with the late Elisabeth Marbury, famous play broker, reading plays at ten cents an act. He saved his money and headed into the show business with a fast running start.

His life is the fulfillment of every commuter's dream. He is of clerical, almost monkish mien, of somewhat austere countenance, with octagonal pince-nez and, like all epicures, abstemious in all things—saving such things as patent models.

He wears red, white and blue suspenders and is very fussy about his handkerchief pocket. He always has the tailor sew a button on it.

A N ATTACK of laryngitis gave Margaret Sullavan her big start. Lee Shubert saw her in "Three Artists and a Lady" at Princeton, and Sore Throat rushed back-stage Gave Start with a contract. "You have a to Screen Ace

voice just like Ethel Barrymore," he said. She explained that it was merely laryngitis, but the excited Mr. Shubert wouldn't listen. There was nothing to be done about it, so the helpless girl was signed for five

That was a bit of luck which, in Miss Sullavan's career, offsets embarrassing entanglements in some of the most elaborate flops in current stage history. Today, she is at the peak of her career as critics turn cartwheels and back flips over the new film, "Three Comrades," and Miss Sullavan's performance therein.

Her story has none of the upfrom-poverty success routine. She is the daughter of a prideful family of Norfolk, Va., a descendant of Robert E. Lee. Her journey to Boston to study dancing was indulged as a passing whim, but there was considerable family eye-rolling when she switched to the theater and began adventuring in summer stock, on Cape Cod and way points. Her father got her home once, but only for a short time. It is to be hoped that her story won't be widely circulated around Hollywood. It would start all the extra girls sleeping in a draft. © Consolidated News Features. WNU Service.

The Average Month We are apt to think of our present months as having four weeks apiece, but that is not true. The average month contains just about four and one-third weeks. The only month with four weeks in it is February, and in leap year even February has one day over four weeks.

No Burial Service for Taylor Gen. Zachary Taylor died at the White House. His body was immediately taken to Louisville and placed in the family vault near the Taylor home just out of that city. He was never formally interred and had no burial services.

A soft crushable Panama with narrow band is the choice of John Beal, above. Men's style forth in one of these new hats. Illustrated above authorities say the old hatless summer days may have been comfortable but it's wiser to protect yourself against the sun.

Here's another current favorite, worn by Alan Curtis. It's a soft, turned-down brim hat of fine manila straw with high dented crown. A narrow maroon band adds a note of color demanded by the men's current fashions.

## TONIGHT'S BURGESS BEDTIME STORY

By THORNTON W. BURGESS OLD MR. TOAD was so puffed out with pride as he started for the Green Forest to dine with Buster Bear that those who saw and the good dinner that he exhim wondered if he wouldn't burst before he got there. Everybody of what was going on about him. He knew where he was going, and this made Old Mr. Toad feel more important and proud than ever. He might not have felt quite so puffed up if he had known just how it had come about that he received this second invitation to dine with Buster Bear. Jimmy Skunk had brought it to him, but Jimmy didn't tell him Buster had been asked to send the invitation and that it was all part of a plan on the part of some of Old Mr. Toad's old friends and neighbors to teach him a lesson.

"What very good taste Buster Bear has," thought he, "and how

"I'm as vain as a peacock," announced Gertrude. "About my red ry so why shouldn't I?

to get married and have a home of my own, I want decorations that Buster was waiting for him. are becoming to my hair. I'd like blue for the main color partly because it's nice on me and also because I have a blue footstool, blue vases and good blue scatter rugs to begin with. But beyond that I'm stuck. I think I'll concentrate spending on the living room, and really make that complete and handsome. The other rooms I'll only furnish enough now to get along. But what about rug, wall color, furniture and curtains for the living room? The room is light and good sized but the floors are bad. My family are giv-

ing me a new spinet piano in blonde

Could you take the idea of dark walls? Because rather a deep brilliant blue for the walls would be becoming to you and awfully smart. Then why not white rubber tiling for the floor? That would be new and not too expensive and you could use the scatter rugs interestingly. Then have your new sofa in a yellow linen slip cover and slip-cover two easy chairs in flowered linen on a white ground. (Buy your uphol-stered pieces "in the muslin"). Make a pair of flowered cushions to match to go on the yellow sofa and at the windows hang billowy white embroidered organdy curtains look so graceful right now but you made very full and to sweep down to the floor.

you are feeling well."

Buster Bear laughed a great grumbly-rumbly laugh. "I always feel fine when there is a dinner of fat ants ready for me," said he. "It is very fine of you to honor me by coming to dine." Here Mr. Toad put one hand on his stomach and tried to make a very grand bow. Peter Rabbit, hiding behind a nearby tree, almost giggled aloud.

"I have ventured to invite another to enjoy the dinner with us," continued Buster Bear. Mr. Toad's face fell. You see, he was selfish. He wanted to be the only one to have the honor of dining with Buster Bear. "He's a little late," went on Buster, "but I think he will be here soon, and I hope you will be glad to meet him. Ah, here he comes now.'

Old Mr. Toad looked in the direction in which Buster Bear was looking. He gave a little gasp, and turned quite pale. All his puffiness disappeared. He didn't look like the same toad at all. The newcomer was Mr. Blacksnake. "Oh!" cried Old Mr. Toad, and then without even asking to be excused, he turned his back on Buster Bear and started back the way he had come. "Ha, ha, ha!" shouted Peter Rabbit, jumping out from behind a tree.

"Ho, ho, ho!" shouted Jimmy Skunk from behind another. "Hee, hee, hee!" shouted Johnny

### Star Dust

★ Goofy Comedies

\* 'The Sheik' Is Funny

★ Restless Holiday — By Virginia Vale —

TT LOOKS more and more as ■ if those goofy comedies were on the wane. First Carole Lombard said she'd have no more of them. Now Claudette Colbert, who helped to start the cycle with "It Happened One Night," has balked.

It was planned that she would do "Are Husbands Necessary?" when

CLAUDETTE COLBERT

she returned from that European jaunt, but instead she'll go to work in "Midnight," which is romantic and dramatic and everything but

Speaking of "It Happened One Night," it was revived recently in New York, and a lot of people who'd heard about how funny it was but had missed it the first time round had a chance to see it. And the addicts who went to it over and over when it was first released found it just as funny as ever.

The revival of Valentino's "The Sheik," seems to have been ill-advised. Any picture that old is bound to look funny nowadays. And the generation of movie-goers that has grown up since the days of Valentino just couldn't understand why he had been such a world-beater. Some of them roared with laughter. They thought Agnes Ayres, the heroine, a bit too fat—though in her day she was considered streamlined! However, no matter what the young folks thought of that picture and the other Valentino revival, "The Son of the Sheik," they brought mobs to the theaters and money to the box offices.

It looks as if George Arliss had been tempted into returning to Hollywood, thanks to Samuel Goldwyn. oldwyn has a picture called "The Exiles" on the fire, based on the stories of the many famous men who have had to leave their homes in Europe because of political troubles. Arliss would play the role of a distinguished scientist.

Warner Brothers will, at last, screen "The Miracle," with Bette Davis in the coveted role of the Nun. Ever since it was so successful as a dramatic spectacle—in London in 1911 and in New York in 1924—there has been talk of doing it for the screen. Now, with Max Reinhardt, its original producer, available, they are ready to start.

When Bob Burns ducked away

from Hollywood for a rest, preparatory to taking over the Bing Crosby radio program for the summer, he didn't do so well in choosing a spot to rest in. He and his wife went to New York, but were so besieged by people that they left and went to Buffalo he wanted to show her Niagara falls. And the

public caught up with them again. He might try wearing a mask, if he really wants to rest!

Margaret Tallichet, a comparative newcomer to the screen, will be Ramon Novarro's leading woman in "As You Are." When and if "Gone With the Wind" reaches the screen she will be seen as Kareen O'Hara, younger sister of Scarlet. Miss Tallichet tried the summer theaters in the East last year, as a way of getting much-needed experi-

ODDS AND ENDS-Nancy Carroll will be seen on the screen again in "There Goes My Heart" . . . Judy Garland has a wrenched shoulder, the result of an automobile accident . . . Bobby Breen won't have the kind of financial trouble that Jackie Coogan is having when he grows up; his parents have arranged to put his earnings into a trust fund, keeping \$200 a month for themselves . . . Sigrid Gurie says her husband threatened to humiliate her by getting a job in a gas station... Lots of wives wouldn't see anything humiliating about that . . . Harold Lloyd's new picture, "Professor Beware," will be released simultaneously at special showings in New York, London and Paris.

We sure owe him a lot | Presently someone opened the front on account of what he did for Frank. door and came out on the porch. But very likely he's that train robber they want in Texas. Must be there?"

A voice demanded, there?" some reason he's hiding here. You don't want to get too sympathetic

'No, if we get a chance we might arrest him and send him back to of the horse. Texas," Ruth suggested scornfully. "There must be a reward for him." "Now — now! No use getting highty-tighty, Miss. He can come

and stay at the L C long as he wants. We'll do all we can for him, since we don't know he is an outlaw," her father said.

"And if we find he is we can kick him out," the girl added. "All he Bob called up. has done is save most of our lives.' Her father grinned ruefully. "You're sure a gadfly, Missy. You talk like I was starting right out to hunt this fellow down. No sense in getting all steamed up about it. If we get a chance to help him we That's all I can promise."

Ruth nodded. She knew her father would pay the family debt if he his office and took the chair to which were given a chance. For herself, she felt a great lift of relief at what her brother had told them.

She desperately wanted to believe in Jeff Gray, to get assurance at least that he was not mean and treacherous. A queer joy flooded

Jeff Gray fitted himself easily into the life of Tail Holt. Frequently he dropped into the blacksmith shop of Hank Ransom and listened to tall stories of the days when Hank had campaigned against the Apaches under Generals Crook and Miles. He struck up an acquaintance with the cobbler, little Ed Godfrey.

He showed no curiosity about those he met. When they came and went, where they lived, what their ostensible occupations were, held no visible interest for him. He accepted each man for what he gave himself out to be. The riders drifting in and out of Tail Holt no longer looked at him suspiciously. Curly Connor liked him, and Curly was a leader. The only man who seemed to resent his presence was Morg Norris, and this was discounted by the fact that the surly youth was friendly to few. Sensitive to atmosphere, Gray de-

duced one day that something unusual was in the air. He saw Norris in momentary furtive talk with Sherman Howard. The big man was giving the other instructions. Norris picked up Kansas and took him out of the Golden Nugget with him. Mile High came in, sauntered over to Howard, held a low-voiced conversation with him, and departed. Presently Gray announced, with a yawn, "Tired of poker," and cashed in his chips. He strolled down to the Alamo corral. Sid Hunt and Kansas were saddling their horses. One of them tied back of the saddle a gunnysack containing oats.

'What about that lame sorrel, Sid?" asked Reynolds. "You be back tonight?"

'You look after it, Jim," Hunt said. "Don't look for us till you see our dust coming up the road." "We got a hen on down Live Oak

canyon way," Kansas said with a

Back of the horse Hunt kicked him on the ankle. Kansas added a rider to his in-

discreet remark: "Or somewheres Each of the men had a rifle strapped beside his saddle.

Gray watched them ride out of town. They took the road to the west, the one Lee Chiswick and his daughter had followed the night of their adventure in front of Sanger's store. Half an hour later, Norris, Mile High, and young Howard left Tail Holt headed in the same direc-

Darkness was falling when Jeff Gray rode out of town. He had never been in Live Oak canyon, but he knew from Pat Sorley that it was on the L C range, not more than three or four miles southwest of the

line-cabin. Were the night riders out to make a raid on L C cattle? That was possible. But why cross 20 miles of Chiswick's range into hill country when plenty of stock could be picked up in the Sweet Spring valley with a much shorter drive to safety?

As he rode through the darkness, mind focused on the problem, another likelihood flashed upon Gray. Occasionally smugglers from Sonora brought silver to Tough Nut to buy goods for consumption in Mexico, thus escaping the Mexican export duty on silver and the import duty on merchandise. In such illicit trading there was a fat profit. Between El Paso and Nogales there was no port of entry. The only custom-house was a shack on the San Pedro river at the point where it runs into the United States. One of the routes followed by smugglers wound through Live Oak canyon From it the descent to Tough Nut

was by an easy grade. The longer he thought of it the more convinced he was that the raid when we'll eat again." be they'll show their hand before we reach them. The Chiswicks would know much better than wouldn't lie about it. He'd come he what to do, since they were fastraight out, with that defiant, mock- miliar with the terrain. If he played a lone hand he might miss the smugglers and let them ride on to

> It was in the small hours when he reached the ranch. At his approach

"Tell Lee Chiswick that Jeff Gray wants to see him," the night visitor answered, at the same time swinging from the saddle on the far side

There was a moment of silence. "What you want with him?" Bob Chiswick asked. "I'll tell him that when I see

him," Gray said dryly. "You run along in and tell him I'm here." A head was thrust out of an upper window. "Who is it, Bob?" 'Says he is Jeff Gray, Father"

"Wait a minute." The head was withdrawn. Five minutes later Lee Chiswick

stepped out on the porch. Gray told him why he was there. To his son Lee said, "Light a lamp in my office, Bob." To Gray, 'Tie your horse and come in."

Gray followed the cattleman into

Finally they drew rei

his host waved him. Lee sat across the table from him. Young Chiswick remained standing.

"First off, Mr. Jeff Gray, if that's your name, let's get it clear where you stand. I'll ask you to come clean, sir. Are you one of Sherm Howard's scoundrels?" "Would I be here if I were?"

Gray asked. Ruth stood in the doorway, her dark eyes dilated with surprise. She

had flung a wrap over her nightgown and she held it caught close to the slippers into which her feet had | ing. In the darkness the horses felt been thrust there was a glimpse of white ankle.

"I'm not asking for a Yankee answer, sir," Lee said impatiently.

saddle all night to bring you the tip-Take it or leave it. "There's a story in Tail Holt that you are Clint Doke, the fellow who Gray rode forward to reconnoirobbed the Texas and Southern,'

persisted Lee. "Not much time for gossip right now if we aim to head off those

scalawags," Gray said. Ruth broke into the talk. "I don't believe it. I don't think Mr. Gray the more uneasy. He could not be is a train robber or a rustler, Father. And I know he isn't one of Sherman Howard's men. Look what

he did for Frank.'

Her father turned in his chair. in," he scolded, "seeing it's none of

"I heard voices," she explained, "and I came down to see who it

"Now you know, you can go back to bed," Lee told her crustily. "Not just yet, please." Gray smiled blandly. "I'm gaunt as a pieded steer after a long drive.

Since you're so sure I'm innocent, Miss Chiswick, how about a cup of have just time for them before we start if you move lively. "Start where?" she asked

The red - headed man waved a hand debonairly at his host. "Ask fore," Chiswick said.

Mr. Chiswick. I wouldn't know "The horses that made them be-Mr. Chiswick. I wouldn't know

Lee said: "Go ahead, girl. Fix him up some food." He added to his son: "Rout Frank and Dan Brand and Buck Conrad out of their beds. See they get horses saddled. Before she left to make breakfast, Ruth flung a question at Gray.

'You are innocent, aren't you?" "I never blocked a brand or ran one over. I never bought or sold a canyon, boys," Lee said. "We are wet horse.'

"Did you hear me tell you to right. We have no evidence as to rustle some grub, Ruth?" her fa- why they are here. So we can't ther asked harshly. "Better fix cut loose at them promiscuous. May-

silver. Moreover, the personnel of the group pointed to something other than cattle - stealing. Neither came through for Frank when he bowlegged man with an imperturb-

that bunch of L C stuff up Box canyon. Pat Sorley checked up on your horse's hoofs."

"He didn't check up well enough. went up the gulch after the thieves, not with them. They passed close to the line-camp in the night. I heard them and went out to see who they were. Pat hadn't been feeling well the night before, so I didn't wake him, but followed the rustlers alone."

"You're a detective for the Cat-tlemen's association. That what you

"You can do yore own guessing. Right now I'm giving no informa-

Chiswick threw out a hand in a gesture of defeat. "All right. Have it your own way. I'll take a chance on you. If you're right about it and this bunch you followed are headed for Live Oak canyon, it is a cinch they are not figuring on running off any of my stock. My guess is the same as yours. They have heard word of some silver smugglers on their way to Tough Nut. At least, that would look reasonable to me. Probably they will lie in wait for them at the rock slide. A thousand big boulders crashed down a million years ago, and filled up the trail so a traveler has to wind around among them. It's a fine spot for an ambush. Question is, can we get to the smugglers before

they reach the canyon?"
"If not, they will probably be wiped out. You know that killer Morg Norris. He'll figure dead men tell no tales.'

"Yes. Three smugglers were drygulched and killed last year. In Skeleton canyon, not in Live Oak. Norris was in that, they say." "Unless the Mexicans fool them and come up some other way,"

Gray said, thinking aloud. "Through Live Oak would be the "Howard must have a spy in Mexico who is in with the smugglers."

"Looks like," Chiswick agreed. Presently Frank Chiswick came into the room. He told his father that the horses were being caught and saddled. "Tony Flores stayed at the bunk-house last night. Do you want him to go?" the young man

"I reckon so. How many rifles all told?

"Four, counting the buffalo gun." The other men trooped into the house for breakfast. They ate by the light of lamps, Ruth and Nelly waiting on them. Plate after plate of biscuits vanished before them. Platters of fried eggs appeared and disappeared. Nelly poured great quantities of coffee. The men ate with the lusty, hearty appetites of hard riders who did not know when they would see food again. During the meal there was little conver-

After breakfast Gray drew Lee Chiswick aside. "Maybe we're figuring this thing

out wrong," he said. "Maybe when Kansas let slip Live Oak canyon, that was just bait for me. Don't you reckon you had better leave guard at the ranch to look after he women? Lee considered this. "No. Men

in this country don't make war on women, not even a fox like Sherm

Gray rode with Lee Chiswick at the head of the little cavalcade.

They came into rough country, a wild jumble of hills and draws her slender, gracious body. Above which made for slow and hard gotheir own way. From the summit of one of the hills Chiswick pointed down to a gash in the rock wall facing them.

"I'm not giving you one," Gray told him curtly. "I've been in the was the Spanish name. We call it Chiswick left the rest of his party

in a mesquite draw while he and ter. The younger man carried Dan Brand's rifle, since he had not one of his own. They rode cautiously, searching the darkness in front of them with their eyes as they moved forward. Of the two Chiswick was sure that his companion was not leading him into a trap from which

he would never come out alive. Neither of them saw any sign of another party. Finally they drew 'Might have known you'd be butting rein and dismounted. Back of a small elevation 50 yards from the mouth of Live Oak canyon they tied their mounts. Very carefully they covered the remaining distance. Within rifle range were a hundred boulders behind which enemies could find cover.

Safely they reached the trail. "They're ahead of us." Gray pointed to fresh tracks.

They examined the footprints, striking matches as they stooped to coffee and some ham and eggs? I'll make out the impressions. One horse had a broken front hoof. Another wore very large shoes and stepped a long way. "I've seen both of those tracks he-

> long to Morg Norris and Mile High," Gray replied. "Where do we go from here? My idea is to follow them into the canyon or along the

Chiswick called to the rest of his posse and the others joined them. Brand recovered his rifle from the red-headed man.

"Norris and his crowd are in the going in after them. But get this we reach them. Anyhow, till I give Ruth vanished. Presently they the word there isn't to be any guncould hear the rattling of stove-lids | play. We're law-abiding citizens.

'How many of them are there?"

(TO BE CONTINUED)

## FARM

SANITARY SYSTEM HALTS MILK LOSS

Extreme Care Is Urged in Cleanliness of Cows.

By John A. Arey, Extension Dairyman, North Carolina State College. WNU Service.

Dairymen lose thousands of dollars each summer as a result of not handling their milk properly. Because milk is so easily contaminated, every person connected with its handling should be clean in his meth-When drawn from healthy cows, few bacteria may be found in

Milk souring is caused by bacteria changing milk sugar into lactic acid. It is impossible to remove these bacteria by straining, as many people think.

Milk receives most of its contamination from the body of the cow during milking. Therefore, it is essential that all parts of the animal's body be kept clean and well-

Then, too, the milker's hands may be a source of contamination, so they should be clean and dry during the milking process.

Small top pails have proven effective in cutting down the number of bacteria that enter while the cow is being milked. Dairymen should recognize this type of container as one of the easiest and cheapest means at his disposal for producing good milk.

All containers used in handling milk should be of metal with all corners and seams completely filled with solder. To clean these containers thoroughly they should first be rinsed in lukewarm water, then scrubbed with a brush in water of the same temperature as that in the rinsing process to which a good alkali washing powder has been added. After washing, sterilize with steam and store in a clean dry place.

Milk should be cooled immediately after the milking process and held at a temperature of below 60 degrees Fahrenheit.

Horses Need Water, Salt

During the Hot Weather Water and salt enable horses to do more work in the summer.

A drink of water every hour in the field in hot weather, all the loose salt the horses want at the barn or in the pasture at night, and reasonable attention by the driver enable horses to work steadily on very hot days, advises a writer in Hoard's Dairyman.

Even colts demand special attention during summer months. Foals from work mares work too hard if they follow in the field. A foal grows better when kept in the barn during the day and turned on pasture with the mare at night. A good plan is to bring the mare in for nursing in the middle of the morning and afternoon while the foal is young.

The proper care of the horse's feet to prevent lameness is always of paramount importance as a lame horse is not a serviceable horse. Feet should be trimmed regularly, and excessive growth should be removed to prevent breaking high, thus causing the horse to become tender and to prevent both toe and quarter cracks.

Eight Breeds of Swine

In the United States there are two distinct classes of swine, the breeds of the lard type and of the bacon type. The plan of feeding has much to do with the class of market hogs produced. As an example, less corn and more oat and barley meal in the ration produces bacon, rather than lard in young hogs. The hogs known as lard breeds are Duroc, Jersey, Poland China, Chester White, Berkshire, Hampshire and Spotted Poland China. Those known as the true bacon breeds are the Tamworth and Yorkshire. These last named are not the only hogs that are producing our bacon.

Starting Mash for Turkeys Turkey growers may use home produced or purchase farm grown grains for a starting mash, if they are balanced with a good protein supplement, says a St. Paul university farm authority. Following is a starter recipe that can be mixed on the farm, provided all ingredients (expressed in pounds) are included: corn 21, wheat bran 10, flour mids 15, ground oats or barley 10, alfalfa leaf meal 15, meat scrap 20, soybean oil meal 10, dried milk 5, salt 1, oyster shell 1, and cod liver oil 2.

Soils used for producing a threeyear rotation of corn, oats and red clover hold 15,600 more gallons of

Water Held by Corn Land

water per acre than if the same soils are used to produce corn continuously without any fertilizer, it is reported by the South Dakota experiment station. If lime, manure and phosphate are used with the crop rotation, the soil will hold 46,-500 more gallons of water per acre than when corn is grown continu-

Yellow Corn for Pullets Yellow corn is to be preferred for growing pullets to other grains for the grain ration, says a Purdue university authority. Most pullets can eat the whole grain by the time they are two months old. Some poultry keepers teach them to eat the whole corn by mixing some cracked corn with the whole corn at first. The change to grain should be made gradually-don't expect the pullets to eat very much whole grain at first—they have to learn.

## WHAT to EAT and WHY

C. Houston Goudiss Discusses

## CALCIUM

The Captain of the Minerals

Nationally Known Food Authority Explains How to Include This Vital Food Element in the Daily Diet

> By C. HOUSTON GOUDISS East 39th Street, New York City

A FEW years ago there was an earthquake in the Far West. When the tremors were over, the frightened people looked in dismay upon the damage that had been done. In some places they were saddened by the loss of a great number of their buildings, and in one community, mingled with their sorrow - almost -

crowding it out of their emo- if the bones were as rigid as they tions—was indignant ANGER. must eventually become, the ordeal of birth would be too difficult For they observed that their for both mother and child. schools had suffered greater damage than any other group of buildings in the city.

On every side, the cry of indignation arose. It was all too plain

that poor materials had gone into the those schools which house children in security. The most vehe-

from the mothers, not only in that community, but all

wittingly, however, they may be and future happiness of their childoing them irreparable harm by dren. failing to feed them the foods that will construct sound bodies, able to withstand the stress and strain

Calcium Starvation

to construct the bony framework. adequate calcium before her baby contractor who constructs a school building of poor materials.

Without sufficient calcium, the bones become soft and porous. They break easily and knit slowly after they are broken. They may bend and twist during growth, so that the child who is a victim of calcium deficiency may become bow-legged and deformed, with a head. Rickets—that horrible dedevelop. And so may tetany-an- gay and so flattering. And the other scourge of childhood.

Crooked Defective Teeth

The teeth, too, depend upon calcium for the soundness of their structure. When this precious mineral is inadequately provided, the baby teeth may soon decay; the permanent teeth may come in crowded and unsightly-and

quickly develop cavities. There are also many other ways that calcium deficiency may handicap your children. For this mineral is intimately concerned with all the body processes. It increases the strength and pulsations of the heart; helps the blood to coagulate in case of injury, thus effectively aiding in preventing hemorrhage. It strengthens the resistance of the body in fever and other diseases. It tones up the nervous system, lessening nervous tension.

Adults Require Calcium Adults have a vital need for calcium. A lack of this mineral not only results in defective teeth, but graceful afternoon dress wil may also be responsible for nerv- make any woman who wears it ousness, quivering and twitching of the muscles and defective heart

**Showing Iodine Content** of Various Foods You are invited to write C. Houston

Goudiss for a chart showing the foods rich in iodine and those which are poor in this substance. It will serve as a valuable guide in preparing balanced menus. Just ask for the Iodine Chart,

addressing C. Houston Goudiss at 6 East 39th Street, New York City. A post card is sufficient to carry your request.

Easily Lost From Body

The homemaker's task of providing adequate calcium is complicated by the fact that the body loses large amounts of calcium construction of every day, and this loss is greater during sickness, especially in fewere supposed to ver or when one is worried, overworked or has taken too strenuous exercise.

Outstanding nutritionists unaniment cries went up mously agree that the American mothers of children, the builders diet is more deficient in calcium than in any other element. And it is squarely up to the mothers over the country. and homemakers to correct this That is natural, for tragic state of affairs, which is all mothers believe they have the undermining their own efficiency children's welfare at heart. Un- and threatening the present health

How to Obtain Calcium

Milk is an outstanding source of calcium. That is why it should form the cornerstone of every balanced diet. Cheese, which is milk ach, provided the leaves are eaten The mineral calcium is to the in concentrated form, is likewise with the flower buds. Careful human body what steel and stone notable in this respect, and one are to a building. It is necessary and one-fourth ounces of American Cheddar cheese are the ap-The mother who fails to consume proximate equivalent of an eightounce glass of milk. Leaf and is born, or fails to give the child adequate calcium throughout the cium than other vegetables or growing years, is as guilty as the fruits, but while their calcium has food for those who like it, but been found to be well-absorbed by it cannot be considered to possess adults, it is not so readily available to children.

You Need This Free List of

FOODS RICH IN CALCIUM

Write to C. Houston Goudiss, 6 East 39th Street, New York City, for his list of calcium-rich foods. Use it daily as a guide in planning family menus.

Among the vegetables, however, there is a wide variation, turnip tops and dandelion greens providing unusually large amounts.

List of Calcium-Rich Foods

I have prepared a list of foods rich in calcium which I shall gladly send to homemakers upon request. I urge every woman to write for this list and use it in planning the daily diet of herself,

her husband and children. You really need such a list in order to avoid the grave consequences of calcium deficiency, for so many of our common foods are calcium poor that it is possible for a diet to be abundant and varied. and still be inadequate in respect to calcium.

The list of calcium-containing foods will help you do a perfect job of building strong, fine bodies

for your children. There is no joy like the joy of creating perfect, healthy children. The architect and the sculptor stand in awe before the realization of their dreams. But you, the of their bodies, you are the mightiest of all. A diet adequate in calcium, for you and your children, will help you build beautifully, wisely and well. Your reward will be the joy, the pride, the heartwarming satisfaction of having accomplished a worthwhile purpose.

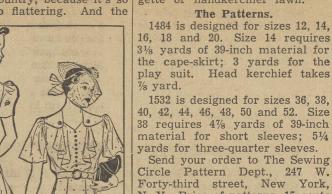

#### Questions Answered

Miss D. A. E.-Broccoli may be used interchangeably with spinanalysis indicates that the leaves are twice as rich as the flower buds in vitamins A and G.

C. J. K .- It is a fallacy to assume that garlic is a blood purifier. Garlic improves the taste of special health properties.

## Are Women Better Shoppers than Men?

GRANTING a woman's reputation for wise buying, let's trace the methods by which she has earned it. Where does she find out about the advantages and details of electrical refrigeration? What tells her how to keep the whole household clean - rugs, floors, bathroom tiling—and have energy left for golf and parties? How does she learn about new and delicious entrees and desserts that surprise and delight her family? Where does she discover those subtleties of dress and make-up that a man appreciates but never understands?

Why, she reads the advertisements. She is a consistent, thoughtful reader of advertisements, because she has found that she can believe them—and profit thereby. Overlooking the advertisements would be depriving herself of data continuously useful in her job of Purchasing Agent to the Family. For that matter, watch a wise man buy a car or a suit or an insurance policy. Not a bad shopper himself! He reads the advertisements too!

But very likely he's that train robber they want in Texas. Must be there?" some reason he's hiding here. You don't want to get too sympathetic

"No, if we get a chance we might arrest him and send him back to of the horse. Texas," Ruth suggested scornfully. "There must be a reward for him." "Now — now! No use getting highty-tighty, Miss. He can come and stay at the L C long as he wants. We'll do all we can for him, since we don't know he is an out-

law," her father said.

"And if we find he is we can kick him out," the girl added. "All he Bob called up. has done is save most of our lives.' Her father grinned ruefully. "You're sure a gadfly, Missy. You talk like I was starting right out to hunt this fellow down. No sense in getting all steamed up about it. If we get a chance to help him we will. That's all I can promise."

Ruth nodded. She knew her father would pay the family debt if he his office and took the chair to which were given a chance. For herself, she felt a great lift of relief at what her brother had told them.

She desperately wanted to believe in Jeff Gray, to get assurance at least that he was not mean and treacherous. A queer joy flooded

Jeff Gray fitted himself easily into the life of Tail Holt. Frequently he dropped into the blacksmith shop of Hank Ransom and listened to tall stories of the days when Hank had campaigned against the Apaches under Generals Crook and Miles. He struck up an acquaintance with the cobbler, little Ed Godfrey. He showed no curiosity about

those he met. When they came and went, where they lived, what their ostensible occupations were, held no visible interest for him. He accepted each man for what he gave himself out to be. The riders drifting in and out of Tail Holt no longer looked at him suspiciously. Curly Connor liked him, and Curly was a leader. The only man who seemed to resent his presence was Morg Norris, and this was discounted by the fact that the surly youth was friendly to few.

Sensitive to atmosphere, Gray deduced one day that something unusual was in the air. He saw Norris in momentary furtive talk with Sherman Howard. The big man was | the table from him. Young Chisgiving the other instructions. Norris picked up Kansas and took him out of the Golden Nugget with him. Mile High came in, sauntered over to Howard, held a low-voiced conversation with him, and departed. Presently Gray announced, with a yawn, "Tired of poker," and cashed in his chips. He strolled down to the Alamo corral. Sid Hunt and Kansas were saddling their horses. One of them tied back of the saddle

a gunnysack containing oats. 'What about that lame sorrel, Sid?" asked Reynolds. "You be

back tonight?" 'You look after it, Jim," Hunt said. "Don't look for us till you see our dust coming up the road." "We got a hen on down Live Oak canyon way," Kansas said with a

Back of the horse Hunt kicked him on the ankle. Kansas added a rider to his in-

discreet remark: "Or somewheres

Each of the men had a rifle strapped beside his saddle. Gray watched them ride out of

town. They took the road to the west, the one Lee Chiswick and his daughter had followed the night of their adventure in front of Sanger's store. Half an hour later, Norris, Mile High, and young Howard left Tail Holt headed in the same direc-

Darkness was falling when Jeff Gray rode out of town. He had never been in Live Oak canyon, but he knew from Pat Sorley that it was on the L C range, not more than three or four miles southwest of the line-cabin.

Were the night riders out to make a raid on L C cattle? That was possible. But why cross 20 miles of Chiswick's range into hill country when plenty of stock could be picked up in the Sweet Spring valley with a much shorter drive to safety?

As he rode through the darkness, mind focused on the problem, another likelihood flashed upon Gray. Occasionally smugglers from Sonora brought silver to Tough Nut to buy goods for consumption in Mexico, thus escaping the Mexican export duty on silver and the import duty on merchandise. In such illicit trading there was a fat profit. Between El Paso and Nogales there was no port of entry. The only custom-house was a shack on the San Pedro river at the point where it runs into the United States. One of the routes followed by smugglers wound through Live Oak canyon. From it the descent to Tough Nut

was by an easy grade. was against smugglers. A packhorse had accompanied the Norris party, probably to carry back the and the crackling of wood. hands with cows. Why bring them | not one of Howard's thieves, but |

| along and leave an expert like Curly | you were with them when they ran From chance remarks Gray had

. Gray did not ride straight for the Father at Tail Holt. He may be bad. That is, he may have done bad things. But he isn't mean. He canyon, but took the road that led to the L C ranch-house. The Chiswicks would know much better than wouldn't lie about it. He'd come he what to do, since they were fastraight out, with that defiant, mock- miliar with the terrain. If he played a lone hand he might miss the smugglers and let them ride on to

It was in the small hours when he reached the ranch. At his approach to the house a dog barked furiously. Presently someone opened the front A voice demanded,

"Tell Lee Chiswick that Jeff Gray wants to see him," the night visitor answered, at the same time swinging from the saddle on the far side

There was a moment of silence. "What you want with him?" Bob Chiswick asked. "I'll tell him that when I see

him," Gray said dryly. "You run along in and tell him I'm here." A head was thrust out of an upper window. "Who is it, Bob?" "Says he is Jeff Gray, Father"

"Wait a minute." The head was withdrawn. Five minutes later Lee Chiswick

stepped out on the porch. Gray told him why he was there. To his son Lee said, "Light a lamp in my office, Bob." To Gray,

'Tie your horse and come in." Gray followed the cattleman into

Finally they drew rei

his host waved him. Lee sat across wick remained standing

"First off, Mr. Jeff Gray, if that's your name, let's get it clear where you stand. I'll ask you to come clean, sir. Are you one of Sherm Howard's scoundrels?" "Would I be here if I were?"

Gray asked. Ruth stood in the doorway, her

dark eyes dilated with surprise. She had flung a wrap over her nightgown and she held it caught close to the slippers into which her feet had | ing. In the darkness the horses felt been thrust there was a glimpse of white ankle.

"I'm not asking for a Yankee answer, sir," Lee said impatiently. "I'm not giving you one," Gray "Canyon Diablo," he said. "That ld him curtly. "I've been in the was the Spanish name. We call it told him curtly.

that bunch of L C stuff up Box canyon. Pat Sorley checked up on your horse's hoofs."

"He didn't check up well enough. went up the gulch after the thieves, not with them. They passed close to the line-camp in the night. I heard them and went out to see who they were. Pat hadn't been feeling well the night before, so I didn't wake him, but followed the rustlers alone."

"You're a detective for the Cattlemen's association. That what you

"You can do yore own guessing. Right now I'm giving no informa-

Chiswick threw out a hand in a gesture of defeat. "All right. Have it your own way. I'll take a chance on you. If you're right about it and this bunch you followed are headed for Live Oak canyon, it is a cinch they are not figuring on running off any of my stock. My guess is the same as yours. They have heard word of some silver smugglers on their way to Tough Nut. At least, that would look reasonable to me. Probably they will lie in wait for them at the rock slide. A thousand big boulders crashed down a million years ago, and filled up the trail so a traveler has to wind around among them. It's a fine spot for an ambush. Question is, can we get to the smugglers before

they reach the canyon?"
"If not, they will probably be wiped out. You know that killer Morg Norris. He'll figure dead men tell no tales.'

"Yes. Three smugglers were drygulched and killed last year. In Skeleton canyon, not in Live Oak. Norris was in that, they say." "Unless the Mexicans fool them

and come up some other way," Gray said, thinking aloud. "Through Live Oak would be the

"Howard must have a spy in Mexico who is in with the smugglers." "Looks like," Chiswick agreed. Presently Frank Chiswick came

into the room. He told his father that the horses were being caught and saddled. "Tony Flores stayed at the bunk-house last night. Do you want him to go?" the young man "I reckon so. How many rifles all

told?

"Four, counting the buffalo gun." The other men trooped into the house for breakfast. They ate by the light of lamps, Ruth and Nelly waiting on them. Plate after plate of biscuits vanished before them. Platters of fried eggs appeared and disappeared. Nelly poured great quantities of coffee. The men ate with the lusty, hearty appetites of nard riders who did not know when they would see food again. During the meal there was little conver-

After breakfast Gray drew Lee Chiswick aside.

"Maybe we're figuring this thing out wrong," he said. "Maybe when Kansas let slip Live Oak canyon, that was just bait for me. Don't you reckon you had better leave guard at the ranch to look after he women? Lee considered this. "No. Men

in this country don't make war on women, not even a fox like Sherm

Gray rode with Lee Chiswick at the head of the little cavalcade.

They came into rough country, a wild jumble of hills and draws her slender, gracious body. Above which made for slow and hard gotheir own way. From the summit of one of the hills Chiswick pointed down to a gash in the rock wall fac-

ing them.

Chiswick left the rest of his party in a mesquite draw while he and ter. The younger man carried Dan Brand's rifle, since he had not one of his own. They rode cautiously, searching the darkness in front of them with their eyes as they moved forward. Of the two Chiswick was sure that his companion was not leading him into a trap from which

he would never come out alive. Neither of them saw any sign of another party. Finally they drew 'Might have known you'd be butting rein and dismounted. Back of a small elevation 50 yards from the mouth of Live Oak canyon they tied "I heard voices," she explained, their mounts. Very carefully they covered the remaining distance. Within rifle range were a hundred boulders behind which enemies could find cover.

Safely they reached the trail. "They're ahead of us." Gray pointed to fresh tracks.

They examined the footprints, striking matches as they stooped to coffee and some ham and eggs? I'll make out the impressions. One horse had a broken front hoof. Another wore very large shoes and stepped a long way. "I've seen both of those tracks be-

> long to Morg Norris and Mile High," them into the canyon or along the Chiswick called to the rest of his

> posse and the others joined them. Brand recovered his rifle from the red-headed man. "Norris and his crowd are in the canyon, boys," Lee said. "We are going in after them. But get this

"How many of them are there?"

asked Buck Conrad, chewing tobacco stolidly. He was a short, thick,

FARM

SANITARY SYSTEM HALTS MILK LOSS

Extreme Care Is Urged in Cleanliness of Cows.

By John A. Arey, Extension Dairyman, North Carolina State College. WNU Service.

Dairymen lose thousands of dollars each summer as a result of not handling their milk properly. Because milk is so easily contaminated, every person connected with its handling should be clean in his meth-When drawn from healthy cows, few bacteria may be found in

Milk souring is caused by bacteria changing milk sugar into lactic acid. It is impossible to remove these bacteria by straining, as many people think.

Milk receives most of its contamination from the body of the cow during milking. Therefore, it is essential that all parts of the animal's body be kept clean and well-

Then, too, the milker's hands may be a source of contamination, so they should be clean and dry during the milking process.

Small top pails have proven effective in cutting down the number of bacteria that enter while the cow is being milked. Dairymen should recognize this type of container as one of the easiest and cheapest means at his disposal for producing good milk.

All containers used in handling milk should be of metal with all corners and seams completely filled with solder. To clean these containers thoroughly they should first be rinsed in lukewarm water, then scrubbed with a brush in water of the same temperature as that in the rinsing process to which a good alkali washing powder has been added. After washing, sterilize with steam and store in a clean dry place.

Milk should be cooled immediately after the milking process and held at a temperature of below 60 degrees Fahrenheit.

Horses Need Water, Salt

During the Hot Weather Water and salt enable horses to do more work in the summer.

A drink of water every hour in the field in hot weather, all the loose salt the horses want at the barn or in the pasture at night, and reasonable attention by the driver enable horses to work steadily on very hot days, advises a writer in Hoard's Dairyman.

Even colts demand special attention during summer months. Foals from work mares work too hard if they follow in the field. A foal grows better when kept in the barn during the day and turned on pasture with the mare at night. A good plan is to bring the mare in for nursing in the middle of the morning and afternoon while the foal is young.

The proper care of the horse's feet to prevent lameness is always of paramount importance as a lame horse is not a serviceable horse. Feet should be trimmed regularly. and excessive growth should be removed to prevent breaking high, thus causing the horse to become tender and to prevent both toe and quarter cracks.

Eight Breeds of Swine

In the United States there are two distinct classes of swine, the breeds of the lard type and of the bacon type. The plan of feeding has much to do with the class of market hogs produced. As an example, less corn and more oat and barley meal in the ration produces bacon, rather than lard in young hogs. The hogs known as lard breeds are Duroc, Jersey, Poland China, Chester White, Berkshire, Hampshire and Spotted Poland China. Those known as the true bacon breeds are the Tamworth and Yorkshire. These last named are not the only hogs that are producing our bacon.

Starting Mash for Turkeys Turkey growers may use home produced or purchase farm grown grains for a starting mash, if they are balanced with a good protein supplement, says a St. Paul university farm authority. Following is a starter recipe that can be mixed on the farm, provided all ingredients (expressed in pounds) are included: corn 21, wheat bran 10, flour mids 15, ground oats or barley 10, alfalfa leaf meal 15, meat scrap 20, soybean oil meal 10, dried milk 5, salt 1, oyster shell 1, and cod liver oil 2.

Water Held by Corn Land Soils used for producing a threeyear rotation of corn, oats and red clover hold 15,600 more gallons of water per acre than if the same soils are used to produce corn continuously without any fertilizer, it is reported by the South Dakota experiment station. If lime, manure and phosphate are used with the crop rotation, the soil will hold 46,-500 more gallons of water per acre than when corn is grown continu-

Yellow Corn for Pullets Yellow corn is to be preferred for growing pullets to other grains for the grain ration, says a Purdue university authority. Most pullets can eat the whole grain by the time they are two months old. Some poultry keepers teach them to eat the whole corn by mixing some cracked corn with the whole corn at first. The change to grain should be made gradually-don't expect the pullets to eat very much whole grain at first—they have to learn.

They may bend and twist during growth, so that the child who is a victim of calcium deficiency may become bow-legged and deformed, with a malformed chest or enlarged forehead. Rickets-that horrible dedevelop. And so may tetany-an- gay and so flattering. And the other scourge of childhood.

Crooked Defective Teeth

The teeth, too, depend upon calcium for the soundness of their structure. When this precious mineral is inadequately provided, the baby teeth may soon decay; the permanent teeth may com'e in crowded and unsightly-and

quickly develop cavities. There are also many other ways that calcium deficiency may handicap your children. For this mineral is intimately concerned with all the body processes. It increases the strength and pulsations of the heart; helps the blood to coagulate in case of injury, thus effectively aiding in preventing hemorrhage. It strengthens the resistance of the body in fever and other diseases. It tones up the nervous system, lessening nervous tension.

**Showing Iodine Content** of Various Foods

You are invited to write C. Houston Goudiss for a chart showing the foods rich in iodine and those which are poor in this substance. It will serve as a valuable guide in preparing balanced menus.

Just ask for the Iodine Chart, addressing C. Houston Goudiss at 6 East 39th Street, New York City. A post card is sufficient to carry your request.

Free List of

FOODS RICH IN CALCIUM

You Need This

Write to C. Houston Goudiss, 6 East 39th Street, New York City, for his list of calcium-rich foods. Use it daily as a guide in planning family menus.

Among the vegetables, however, there is a wide variation, turnip tops and dandelion greens providing unusually large amounts.

List of Calcium-Rich Foods

I have prepared a list of foods rich in calcium which I shall gladly send to homemakers upon request. I urge every woman to write for this list and use it in planning the daily diet of herself, her husband and children.

You really need such a list in order to avoid the grave consequences of calcium deficiency, for so many of our common foods are calcium poor that it is possible for a diet to be abundant and varied. and still be inadequate in respect to calcium.

The list of calcium-containing foods will help you do a perfect job of building strong, fine bodies for your children.

There is no joy like the joy of creating perfect, healthy children. The architect and the sculptor stand in awe before the realization of their dreams. But you, the ment cries went up mously agree that the American mothers of children, the builders of their bodies, you are the mightiest of all. A diet adequate in calcium, for you and your children, will help you build beautifully, wisely and well. Your reward will be the joy, the pride, the heartwarming satisfaction of having accomplished a worthwhile purpose.

#### Questions Answered

Miss D. A. E .- Broccoli may be used interchangeably with spinanced diet. Cheese, which is milk ach, provided the leaves are eaten with the flower buds. Careful analysis indicates that the leaves are twice as rich as the flower buds in vitamins A and G.

C. J. K .- It is a fallacy to assume that garlic is a blood purifier. Garlic improves the taste of special health properties.

### Charming Midsummer Styles

## Are Women Better Shoppers than Men?

GRANTING a woman's reputation for wise buying, let's trace the methods by which she has earned it. Where does she find out about the advantages and details of electrical refrigeration? What tells her how to keep the whole household clean — rugs, floors, bathroom tiling-and have energy left for golf and parties? How does she learn about new and delicious entrees and desserts that surprise and delight her family? Where does she discover those subtleties of dress and make-up that a man appreciates but never understands?

Why, she reads the advertisements. She is a consistent, thoughtful reader of advertisements, because she has found that she can believe them—and profit thereby. Overlooking the advertisements would be depriving herself of data continuously useful in her job of Purchasing Agent to the Family. For that matter, watch a wise man buy a car or a suit or an insurance policy. Not a bad shopper himself! He reads the advertisements too!

#### Beautiful Scenery, Gaiety, Sports And Quiet Life on the Famed Riviera

Prepared by National Geographic Society. | way to La Spezia is fastened on Washington, D. C.—WNU Service. ACATION cruises to the merous visitors to the Italian Riviera, continuation of the French Riviera section which has become Europe's synonym

for vacationland. The Riviera stretches toward the sunrise and the sunset. Genoa is around is the greenery of the superb the dividing point. To the east is the Riviera di Levante-"the coast of the rising sun." To the west and on across the French border extends the Riviera di Ponente-"the

coast of the setting sun.' Two distinct designs for living are traced along the beautiful coast of the Italian Riviera. One is splashed village. Can life hold back any sewith gaiety and sport; the other is crets when lived on a series of ladas normal as life in any of the other | ders? provinces of Italy. Whoever neglects to penetrate the vicissitudes, hopes, and trials of the life of the native for the sake of that more obvious life of the casinos and luxury places | the people. Their life may be armisses the true soul of the region.

To find this life of the people, one must flee hotels and villas and nest in a tiny house clinging to the cliffs, not too far from the sea to run down for an early morning splash. There is a problem that one is never able to settle: whether the Mediterranean is more beautiful when it is viewed from the height of a villa or when it is explored along the shore. Gazing down at was its specialty. Hand-made velthe points of rock and at the sea that slips in between them to make blue bays with an edge of waves above now—yes, just as it had alin fluffy ruffles, one may prefer the ways been.

Portofino is an unbelievable sort of place. It gives no intimation of But it is true. The hand looms are its existence until it lies before you, there. The women weavers are at below you. It is reached by leaving Santa Margherita and the sea and wandering over a road in the hills.

#### Portofino a Lovely Picture.

All of a sudden, as the high road turns, a picture lies before you. It hidden in a cleft of the rock, has is something of the imagination, un- upheld ideals of the craft of the real, but with such charm as thrills weaver of hand-made velvet. Even a child after the visit of Santa the owner of a factory of a thousand Claus. You want to thrust out a yards a day must bow before Zoagsudden hand and topple over the li. row of colored houses set in the water in an outward sweep, for the fun of standing them up again.

And where does the water come from? All around are wooded hills; no sight nor sound of sea. But for the little yachts at anchor, it might be thought an inland lake. But not even that nor anything else, gives reason for the curving line of high houses which seem to have been transferred en bloc from some

Take a climbing footpath up the opposite hill. As you mount, you pass gardens of an occasional fine They seem not to belong at all, but must be tolerated because it is the way of some rich Genoese to build such misfits.

Up at the top of the path is a little church on a terrace. Walk forward beyond the obstruction of verdure, and the sparkling Mediterranean lies spread at your feet. One good jump, a stiff fall of 500 feet, and you would be in its frill of waves under the cliff. Contrast it with the hill-locked harbor of Portofino just behind you. You laugh with delight at the beauties of inconsis-

A gate beside the public terrace opens into a path along the top of the cliff and reaches ultimately a well-known villa. It has been used as a setting for novels, as a retreat for distinguished individuals, as a home of reasonable revelry for orderly intellectuals, but the casuals of the road may not penetrate. It is the Castello San Giorgio, a private property, and one stops, longing like the peri outside the gate of para-

#### Rapallo Now Is a Resort.

Rapallo has become rather much of a resort. Nature gave it a harbor curving in from the peninsula of Portofino, but a shallow harbor, just nice for fishermen, not yachts. A promenade follows its pebbly beach, where children played without danger and where groups of maidens walked on Sundays and threw important glances over the shoulder at groups of young men who did the same. All these things go on still, but under the eye of the people of a casino and big new

hotels. Where a mountain stream ran down to join the waters, women are washing. A common sight, but if you think on the details it is a sad-

dening one. The woman who washes gossips with those near her; sometimes a young one breaks into a gay song. These ameliorations are but trifles to those near Bordighera. against the discomforts. She who washes must do her work kneeling which is lower than she herself. What aches and weariness must be enemy. hers! And the water itself is as cold as mountain heights can make

Mountain cliffs coming down into the bay have split into occasional early Italians chose to build a vil- is no God but God," they cried for lage and called it Zoagli. It is a the benefit of the heathen beyond mere crack in the rock. The rail- these gray mountains.

miraculously high above. Was Zoagli originally a smug-Mediterranean bring nu- glers' nest or a refuge from Saracens? Its appeal is strong; its beauties are unique; even its occupational life deserves both these adjectives. As it has no width, life there is lived on the perpendicular, a sort of Jacob's-ladder life, ever ascending and descending; and all steeps which give so stingy a space to the little village.

#### No Privacy at Zoagli.

The beach is a place of entry and departure. It is like a gate in a walled city, for movement and for No one can go or come without the cognizance of all the

A few donkeys do the heavy carrying up steep ways, exclusive donkeys that by sharing the isolated life seem to take their place with duous, but they have the honor of sharing the house as well as the labor of the humans-communistic donkeys, in a word. You can see them all alone, digging their toes into the upward path or turning suddenly into a doorway of this village without wheels.

The innkeeper tells you proudly that the best velvets of Italy have always been made in Zoagli. That vets, "certo." You can see the hand looms and the weavers at work up

Patiently you climb, although skeptical of a trap to catch a tourist. work. Piles of narrow ruby velvet lie about, catching the light like gems, in small, clumsy rooms that smack of the Thirteenth century.

For centuries this little village,

#### Coast of the Setting Sun.

Leaving the Riviera di Levante, you may experience the joys of motoring to places on the Riviera di Ponente, and in that glad territory that now belongs under the French flag but keeps the Italian soul in the breast of its oldest people.

Everywhere you drive your car you run into the Saracens-their towers, their history, and their evil reputation. They belong to that marvelous Mohammedan civilization that in the Middle ages surpassed in certain things the culture of Europe, much of which was then undeveloped. They began the habit of leaping across the Mediterranean from North Africa when the first detachment of these able pioneers touched Gibraltar and proceeded

to possess Spain. And what did they there? They built at Cordoba a mosque, now a cathedral, which is still the glory of the city; they built at Granada a palace which still makes poets and artists of all who have the happiness to linger in its recesses; but they were routed by the people already living in Europe, and ever since have been branded as criminals and

savages. The people who drove them out were even less mannerly than they. This you learn at the marvelous village of Eze near that point of the Moyenne Corniche (as the middle road from Nice to Menton is called) where the rock rises like a monument above it and seems to dominate sea and penetrate sky.

All the world is on wheels nowadays; but no wheels of any size enter Eze-only those of hand cart, perhaps, and the feet of men and donkevs.

Toiling up the slope with delight at every step, you pass through an archway. It is the city gate. No city opens before you; only a paved path, narrow and steep. There is not a yard of level walk in the entire maze of ways. Of real streets there are none.

#### Wonderful View From Eze.

Extended arms touch both side walls at once. One might be in a crypt, so frequent are the arched spaces through which one gropes. Yet from tiny windows above are bright eyes peeping and taking in

every movement of the strangers. The castle at last, or rather its site, for the walls are nearly gone. Not so bad after all, for now nothing stops the eye; the view is from the mountains of the Esterel

From here the Saracens could look across the sea almost as far and bending well over the water, as their Africa and on every side could see the approach of friend or

One can feel the presence of those bold, skilled men, trying to make strongholds and keep them, that they might bring the land into the culture of those who held to the In one such chasm the True Faith of the Prophet. "There

## July 4, 1776: The March of Freedom Begins

By RAYMOND PITCAIRN @ Western Newspaper Union.

ALL men are created equal. They are endowed by their Creator with certain unalienable rights.

Among these are Life, Liberty and the pursuit of Happiness.

To secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed.

When, 162 years ago, the men who drafted our Declaration of Independence wrote those words they startled much of the Old world with what seemed a new and revolutionary philosophy of government.

But it wasn't altogether new. It wasn't altogether unique. It represented something greater, something more significant, something far more dramatic than mere novelty.

What the Declaration of Independence had done was to put into words that were crystal clear, the hopes and aspirations that had lived in the hearts of men since before the dawn of

And what the nation which produced and supported that Declaration achieved was to translate those ancient hopes and aspirations into glorious reality.

For freedom is the fruit of many centuries of labor and conflict. It was wrought out of the oldest dreams of humanity. It was bought by bloodshed and suf-

No one can say with certainty what battles were fought, what forlorn hopes were led in that age-old struggle during the dawn of history. But the spark must have been there or it could not have glowed so brightly in the

centuries to follow. Certainly when primitive men first began to dwell in groups and formulated laws for their own rule, one of the burning questions must have been the issue between the powers of government and the freedom of the

individual. Government prerogative and individual liberty! Both were necessary; the one for order, the other for freedom. But always there has persisted the fundamental urge of the common man to prevent the first from overwhelming and destroying utterly the second. And often there have been men and movements that gave the demand fresh strength. We do not know them all. But, in chronological order, here are a few of the events which preceded and found inspiring expresion in our American Declaration of Independence.

#### The Ancient World.

Recorded in the cuneiforms of ancient Babylonia, archeologists have found an old, old code of laws. It is the code of Hammurabi, remarkable for its clarity and practicality. But what makes it extraordinary in the minds of historians is the fact that in that dark period of conquest and tyranny it defined certain safeguards and prerogatives of the common man. It was an early, a limited, but a definite, statement in law of certain of his "unalienable rights."

Other ancient laws protecting certain liberties are known, among them the familiar Mosaic code of the Bible, but the code of Hammurabi is perhaps the ear-

#### Greece and Rome.

Ancient Greece and ancient Rome, often called cradles of civilization, were also effective cradles of freedom.

An early system of direct democracy developed in the city-state of Athens. While this was a far cry from the republics of today, it represented, nevertheless, a significant stride in the march toward freedom. There, for the first time, government was in the hands of a certain group of citizens, rather than of hereditary or appointed mon-

By the year 594, B. C., Solon, the Law-Giver, had strengthened the foundations of Athenian democracy by instituting an early form of trial by jury. Thus another brand was added to the torch of freedom.

Across the Adriatic sea from Athens, early Rome rejected the rule of kings at about the same period. "Horatius at the Bridge" was not merely a figure of poetry. He was a symbol of the Roman people's determination to defend their democracy from a possible return of exiled kings.

In the year 490 B. C., Phidippides made a famous run-from the battlefield of Marathon to the free city of Athens. But it was neither his speed nor his endurance that made that 26-mile run famous. It was the fact that he carried the news of the victory of the armies of Athenian democracy over those of the Persian tyrant, Darius—a victory which ended the menace of Oriental

without representation.'

ble only to tyrants.'

Less than a century later the

despotism to the free states of Greece. Two decades later Pericles, chosen ruler of Athens, introduced a written constitution, granting the right to vote to all free men. Quickly Greek culture blossomed, as a result, into its

Golden age. In Rome, meanwhile, the Twelve Tables of Law were formulated during the year 451 B. These are the basis of the whole Roman legal system and as such have played a large part in both British and American law. They were written with the understanding that Roman citizens should have a voice in the enactment of any additions which governed their rights and

Plato and Aristotle. Other lasting contributions to the cause of human liberty were made in the classic writings of

ancient Greece. In the year 399 B. C., Plato, the great Athenian political philosopher, published his "Republic," a dream of a better, more democratic world. In this imagined nation many of the "unalienable rights of man" were fully secured. While Mother Earth has never seen a state modeled completely after Plato's specifications, the ideas he advocated have had an enduring influence

on the thoughts of men. Aristotle, brilliant pupil of Plato, and "Father of Political Science," published his famous "Politics," in 332 B. C. This great work was based on one of the most thorough studies of existing constitutions and political systems ever undertaken. No less than 130 separate constitutions were studied by Aristotle and his assistants in compiling it. His was a notable contribution to the cause of freedom. He preached universal education, without which no democracy can long endure, and in association with which no tyranny can long con-

The democracy of Greece fell, largely because of an indifference on the part of its citizens toward the affairs of state. In Rome, the Republic lasted several centuries longer, before it, too, became embroiled in petty quarrels and toppled, as schem-

#### ing demagogues took control. The Northern Races.

When, early in the Fifth century, Imperial Rome crashed in ruins, history wrote finis to one of the most autocratic periods of rule on record. And although the northern Europeans who toppled that mighty empire were still barbarians, there blazed in them a fierce spirit of independence. Shortly after the crash of the Empire, certain of their tribes, the freedom-loving Angles and Saxons, invaded Britain. To the British nation which was to develop they brought that urge for liberty which has become so dominant a part of the national

character. And although continental Europe for centuries was trodden under the heels of minor despots, men still read and dreamed of liberty. Often they fought for it. That was why, under Charles Martel, they turned back the Saracen invaders, with their traditions of autocratic rule, who had conquered wherever else they

ranged. During the Ninth century, Alfred the Great mounted the throne of England. Under him the British became a united people, with the culture of the freedom - loving Anglo - Saxons pre-dominating. The justice of Alfred still remains a great tradition in law.

Then in 1066, came the Norman invasion, bringing into Albion the Roman Code of Laws, from which our modern law de-

In the significant year 1101, Henry I was crowned king of England, and at his coronation the charter which bears his name was promulgated. This contains most of the "ancient liberties" whose return the barons sought at the time of Magna Charta, and listed many of the "unalienable rights" which Americans de-

In many ways 1215 may be considered among the most imporlaration of Independence—gov-ernment which "derives its just powers from the consent of the

By 1621 was put into effect the Virginia constitution, which again provided for representative assemblies and drastically limited the powers of the royally-appointed governor

Across the Atlantic, meanwhile, the English Petition of Rights appeared in 1628. This document, among other things, restricted the Crown from levying taxes without the people's consent or imprisoning anyone without due process of law.

During the year 1648, in which the treaty of Westphalia recognized Holland and Switzerland as independent republics, the first written constitution was introduced in England by Oliver Cromwell. His republic was founded on the principle that "the people are, under God, the original of all just power; and the commons of England, in parliament assembled, being chosen by the people have the supreme power." Unfortunately, the re-public ended in failure in 1660, but the principles it enunciated could not be subdued.

#### Bill of Rights.

In the American Colonies a notable contribution to freedom's cause was the establishment in 1683 of the New York Charter of Liberties. This guaranteed the calling of a representative assembly at least once every three years, and contained a Bill of Rights, including such "unalienable rights of man" as fair trial

Then, under William and Mary, the English parliament, in 1689, passed a Bill of Rights which re-affirmed the principles of the previous constitution, the Magna Charta and all other "documents of freedom." This decided, once and for all, in favor of parliament as against the authority of the Crown.

But no true democracy had yet been fashioned in England. Parliament was in control, but membership in that body was, primarily, the privilege of the aristocratic class. Many brands had been gathered for the torch of freedom, but it was not yet com-

To John Locke, who died in 1704, historians credit the presentation of the true theory of modern democratic government. Often called the "Father of Modern Democracy," Locke published two treatises on civil government. These, with the later writings of Rousseau, exposed the fallacy of the "divine right of kings," and profoundly influenced the men who wrote our Declaration of Independence.

Soon, however, the most autocratic of the English kings mounted the throne, ruling at home as boldly as he dared, and subjecting his colonies to preposterous demands. George III, whose history, in the words of the Declaration of Independence, was one of "repeated injuries and usurpations, all having in direct object the establishment of an absolute tyranny," tried the patience of the colonists beyond endurance.

In the Stamp Act congress of 1765, meeting in New York city, their protests found expression. The congress drew up a petition of rights and grievances for transmission to the English king. In that document was contained a list of the "unalienable rights of man." But this, too, George III chose to ignore. He succeeded thereby only in uniting the colonists in a greater insistence upon these rights.

The Boston Tea Party of 1773 followed. Violently it expressed the resentment of the country against taxation without representation. And from that date the colonists acted not as 13 independent groups, but as one people determined to secure freedom for themselves and their In 1774 the First Continental

congress met in Philadelphia to discuss further the colonies' grievances against the king, to hear that all their petitions for redress had been ignored, and to petition the king once more for restoration of their rights. Again the king chose to rebuff

his New World subjects. To the colonists there seemed but one thing to do—strike for independence! This was foreshadowed by the Virginia Bill of Rights, passed, early in 1776, by the outraged people of that colony. The recourse was revolu-

The Torch Is Lighted. And so, early in the summer of 1776, the chosen representatives of the colonists met at historic

Independence hall in Philadelphia. There this group of freedom-loving and fearless men drew up the immortal charter which America honors on our greatest national holiday. On July 4 they proclaimed to the world, in the Declaration of Independence, that the unalienable rights of men would endure.

. . . Actually that date is more than an American anniversary. Its significance is world-wide-and timeless. Finally and conclusively its great event lit the glorious torch of freedom. A torch which ever since that day has flared as a beacon light to all nations and all races. A torch which still lights the way to release to peoples across the seas, now under the heels of dictators and demagogues. A torch which forever will guide and inspire.
